

Aurora Tech

Company Portfolio

Customized and state-of-
the-art software solutions

About Us

Think beyond pixels and code—think transformation.

At Aurora Tech, we don't just build software; we craft powerful digital experiences. From stunning websites to innovative mobile applications, we bridge the gap between vision and reality, helping businesses thrive in the digital world.

With cutting-edge technology, AI-driven solutions, and a passion for innovation, we bring your ideas to life—seamlessly, efficiently, and with exceptional results.

Ready to redefine your digital presence? Let's build the future together.

Mission, Vision & Values

Our Mission

To elevate businesses
through Digital
Transformation.

Our Vision

To become the most trusted
and globally influential
software company in the
Middle East and beyond.

Our Values

We value honesty,
effectiveness, competence,
integrity and accountability

Our Services

Web Development

From sleek landing pages to enterprise-level platforms, we build responsive, high-performance websites optimized for scalability and user engagement.

Mobile Application Development

We design and develop intuitive mobile applications for iOS and Android, ensuring seamless user experiences with top-tier performance.

System and Desktop Development

From business automation tools to complex enterprise systems, we develop robust and high-performance desktop applications tailored to your operational needs.

Our Services

UI/UX Prototyping

We craft visually stunning and user-friendly designs, ensuring every digital experience is seamless, intuitive, and aligned with your brand identity.

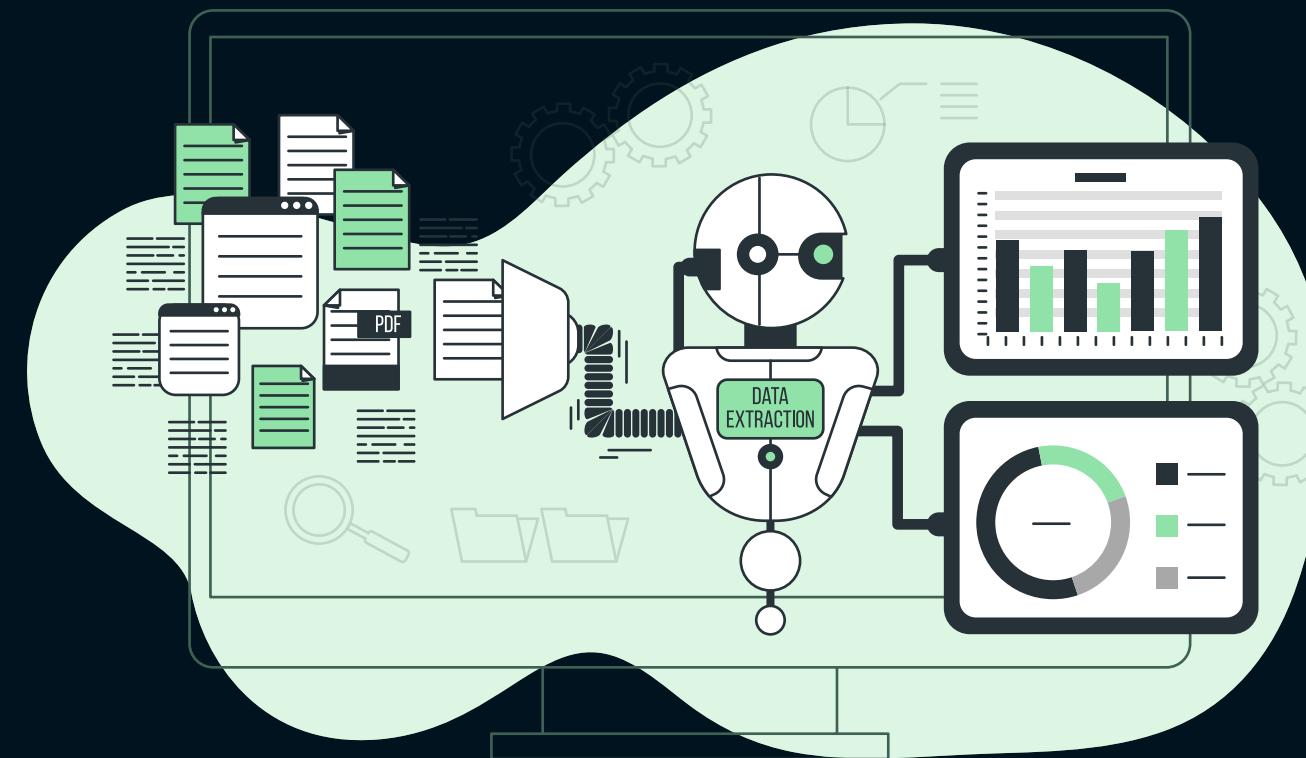

SaaS Solutions

We specialize in building large-scale SaaS platforms, empowering businesses with cloud-based solutions that are secure, scalable, and feature-rich.

AI & Machine Learning

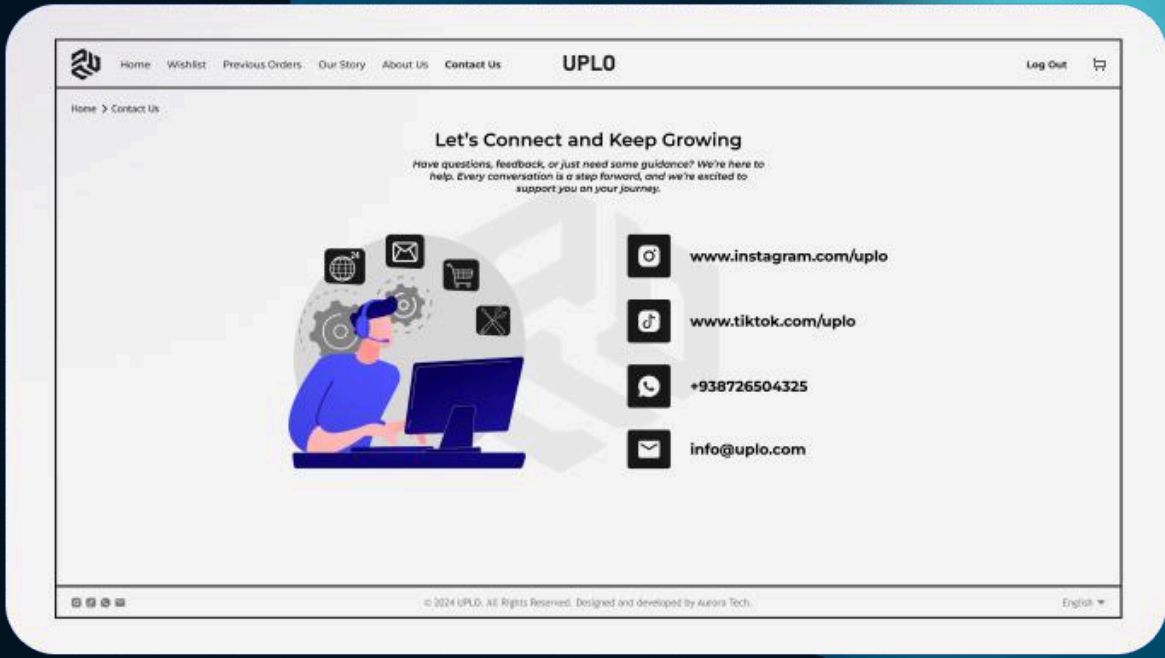

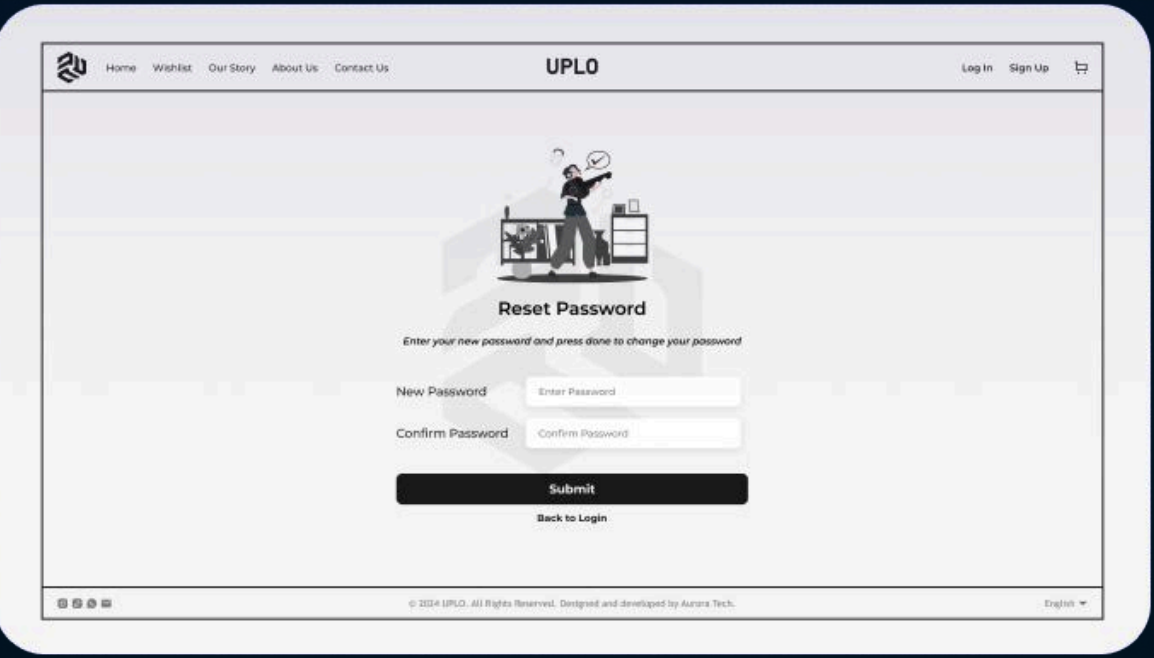

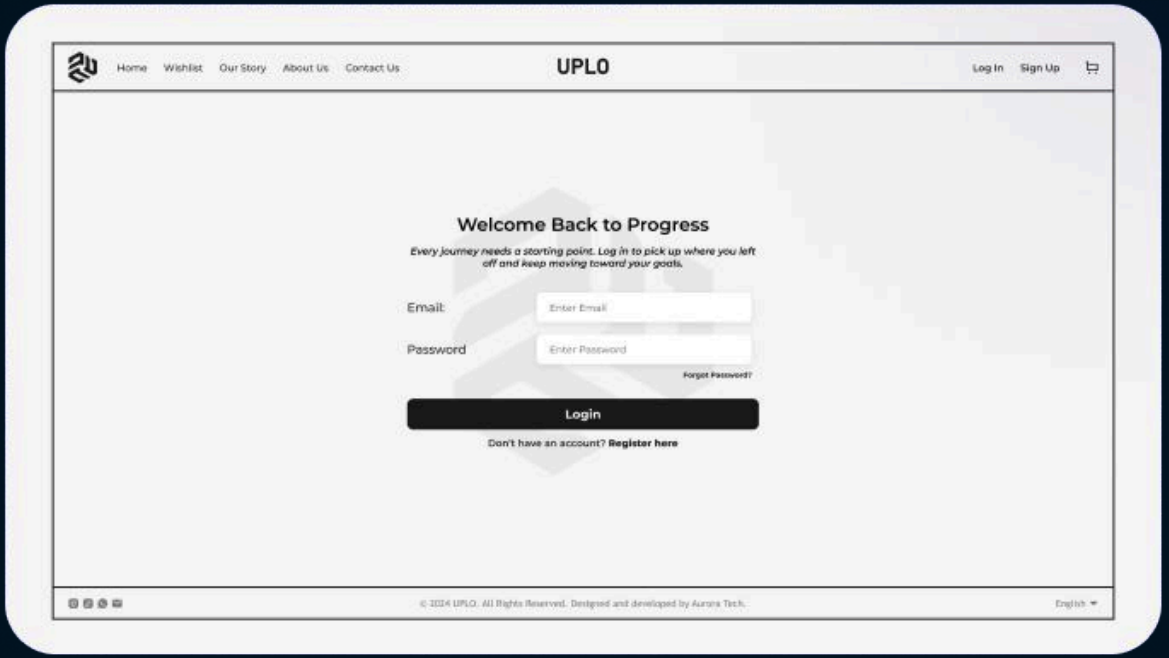

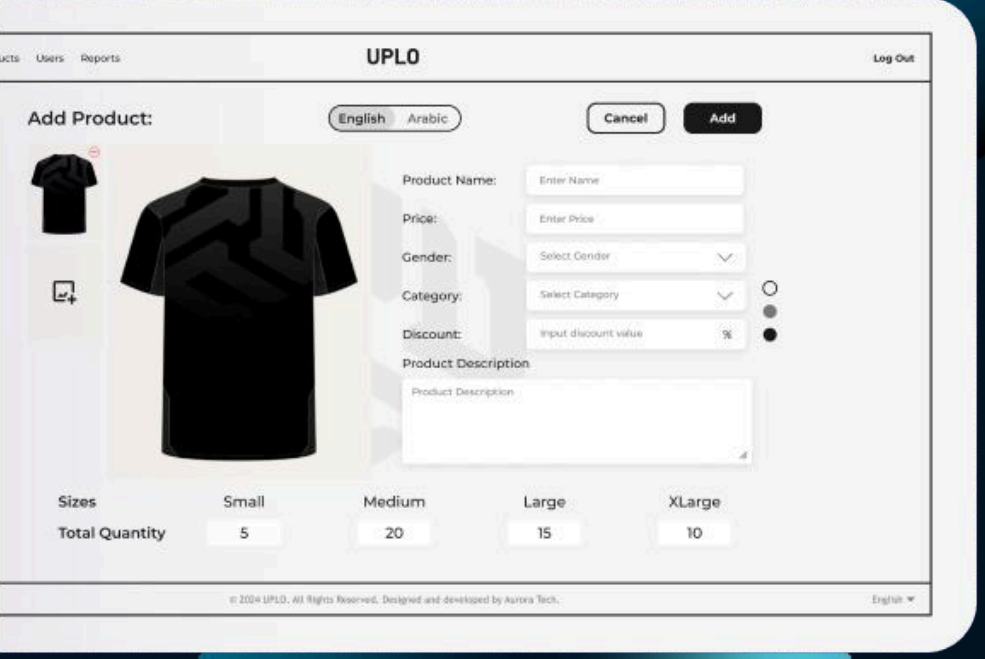

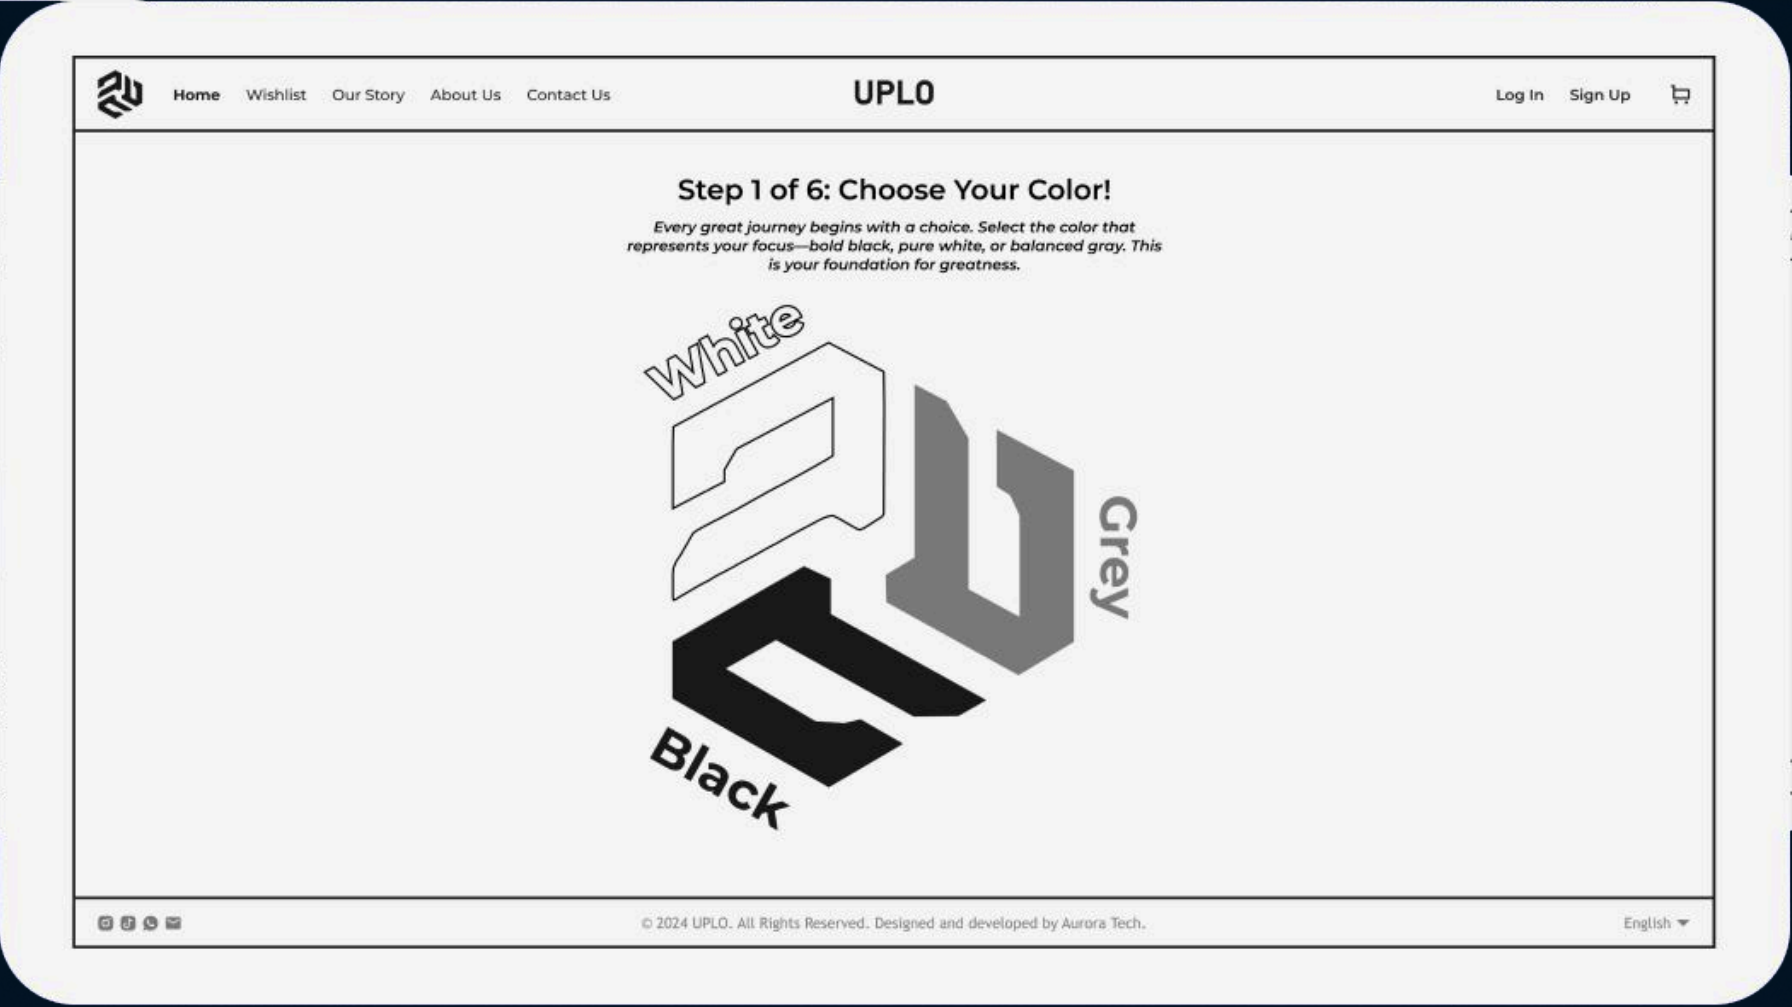

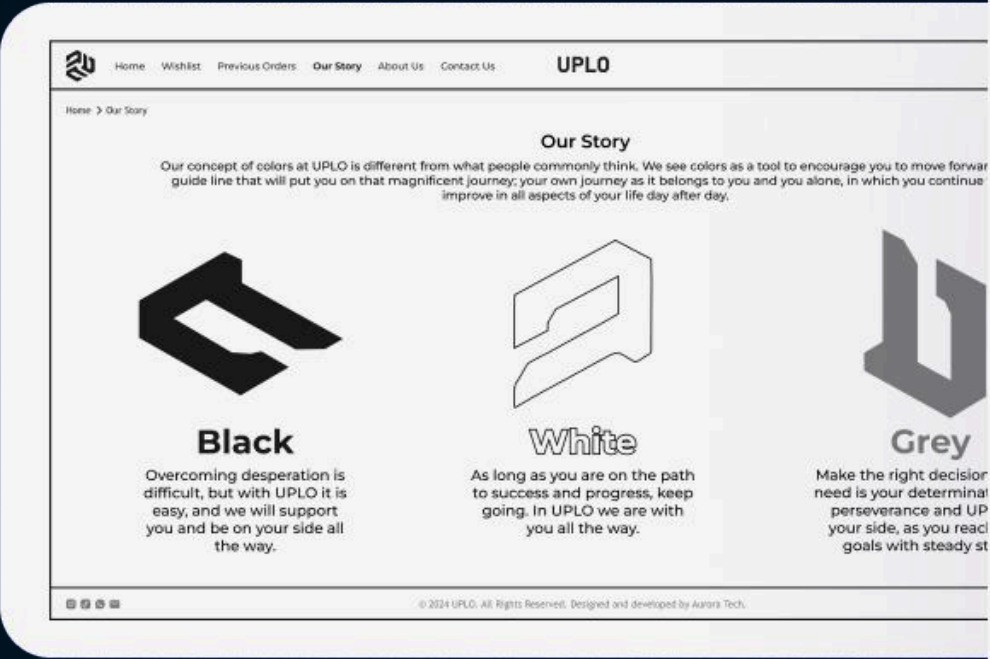

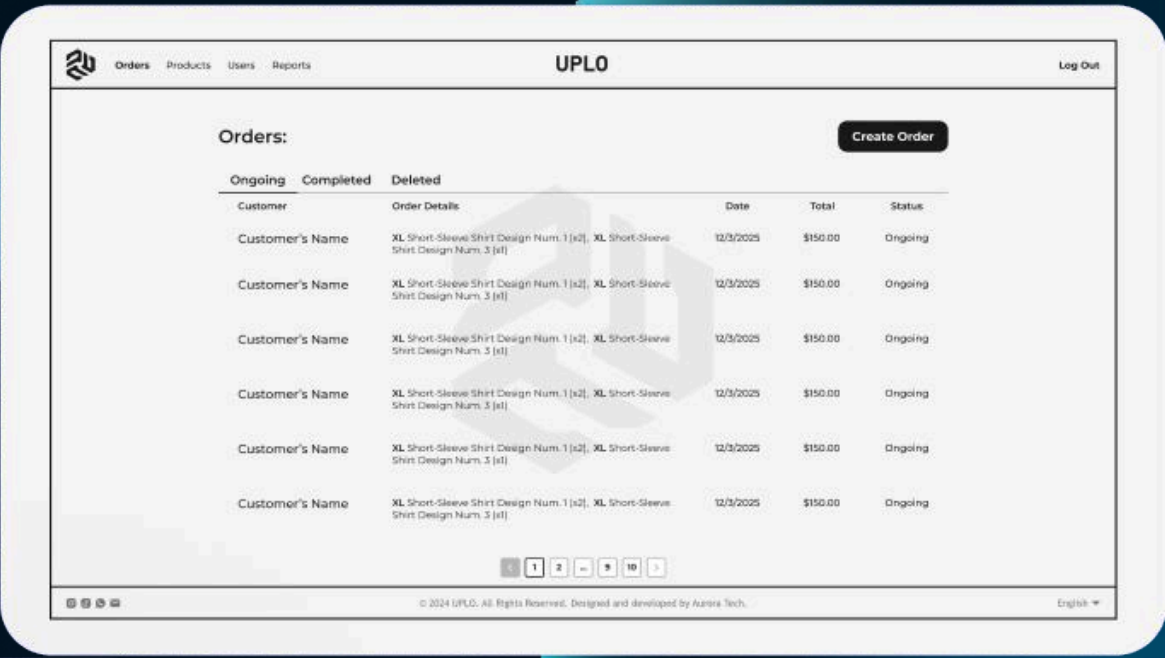

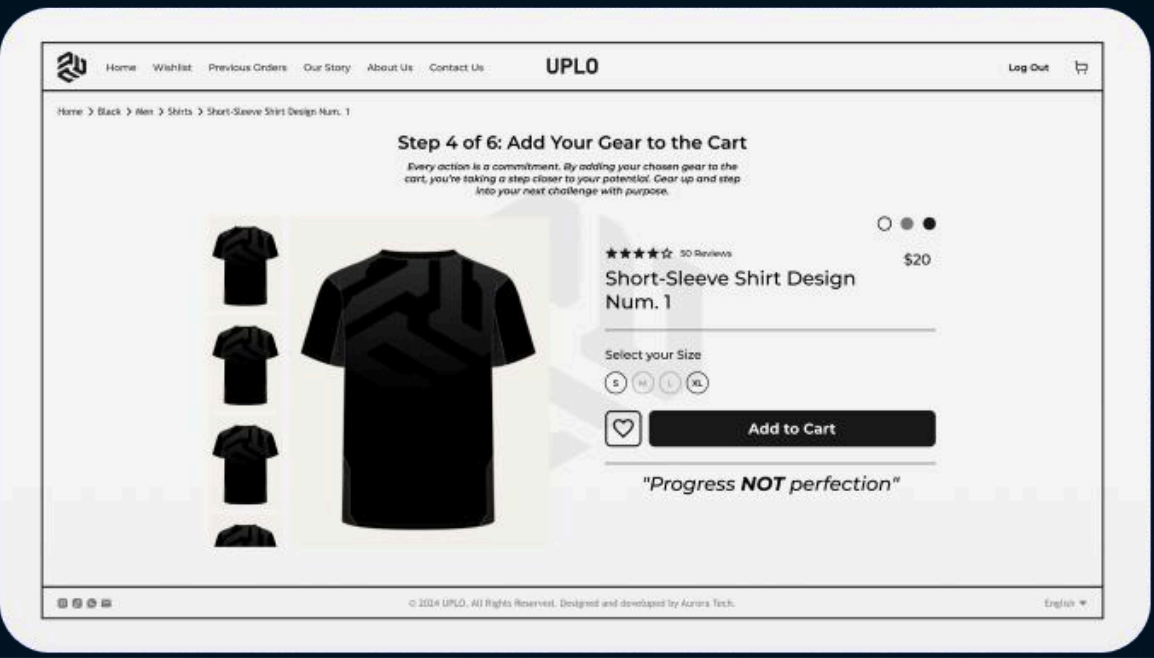

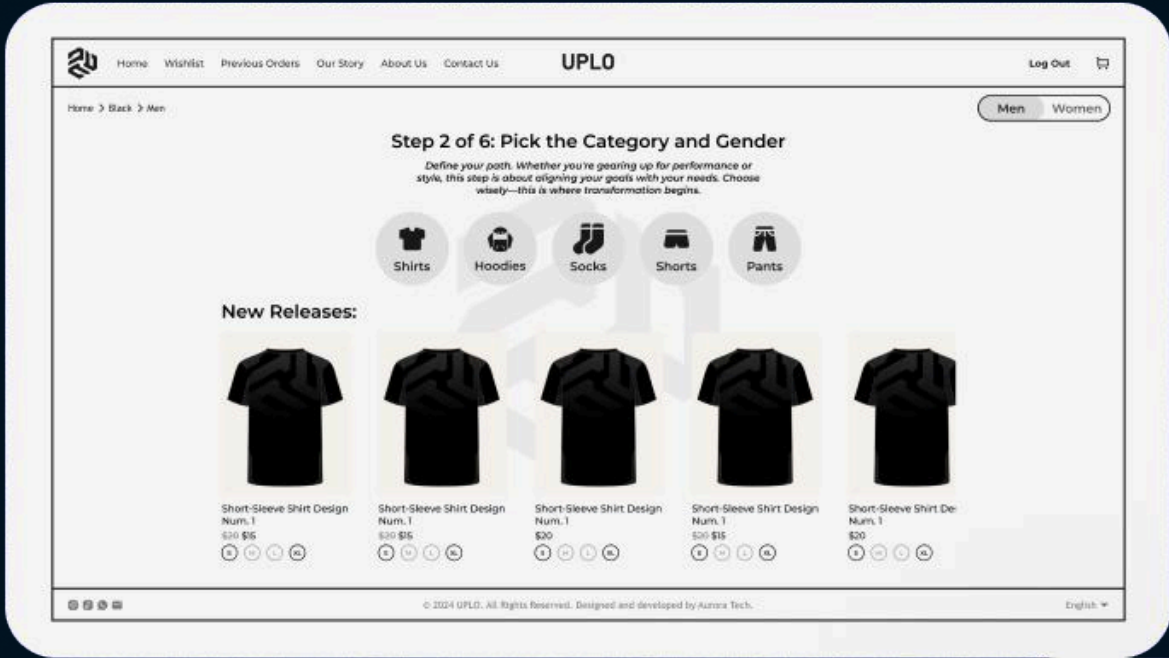

Harnessing the power of Generative AI & ML, we create intelligent automation, predictive analytics, and AI-driven content solutions to enhance decision-making and efficiency.

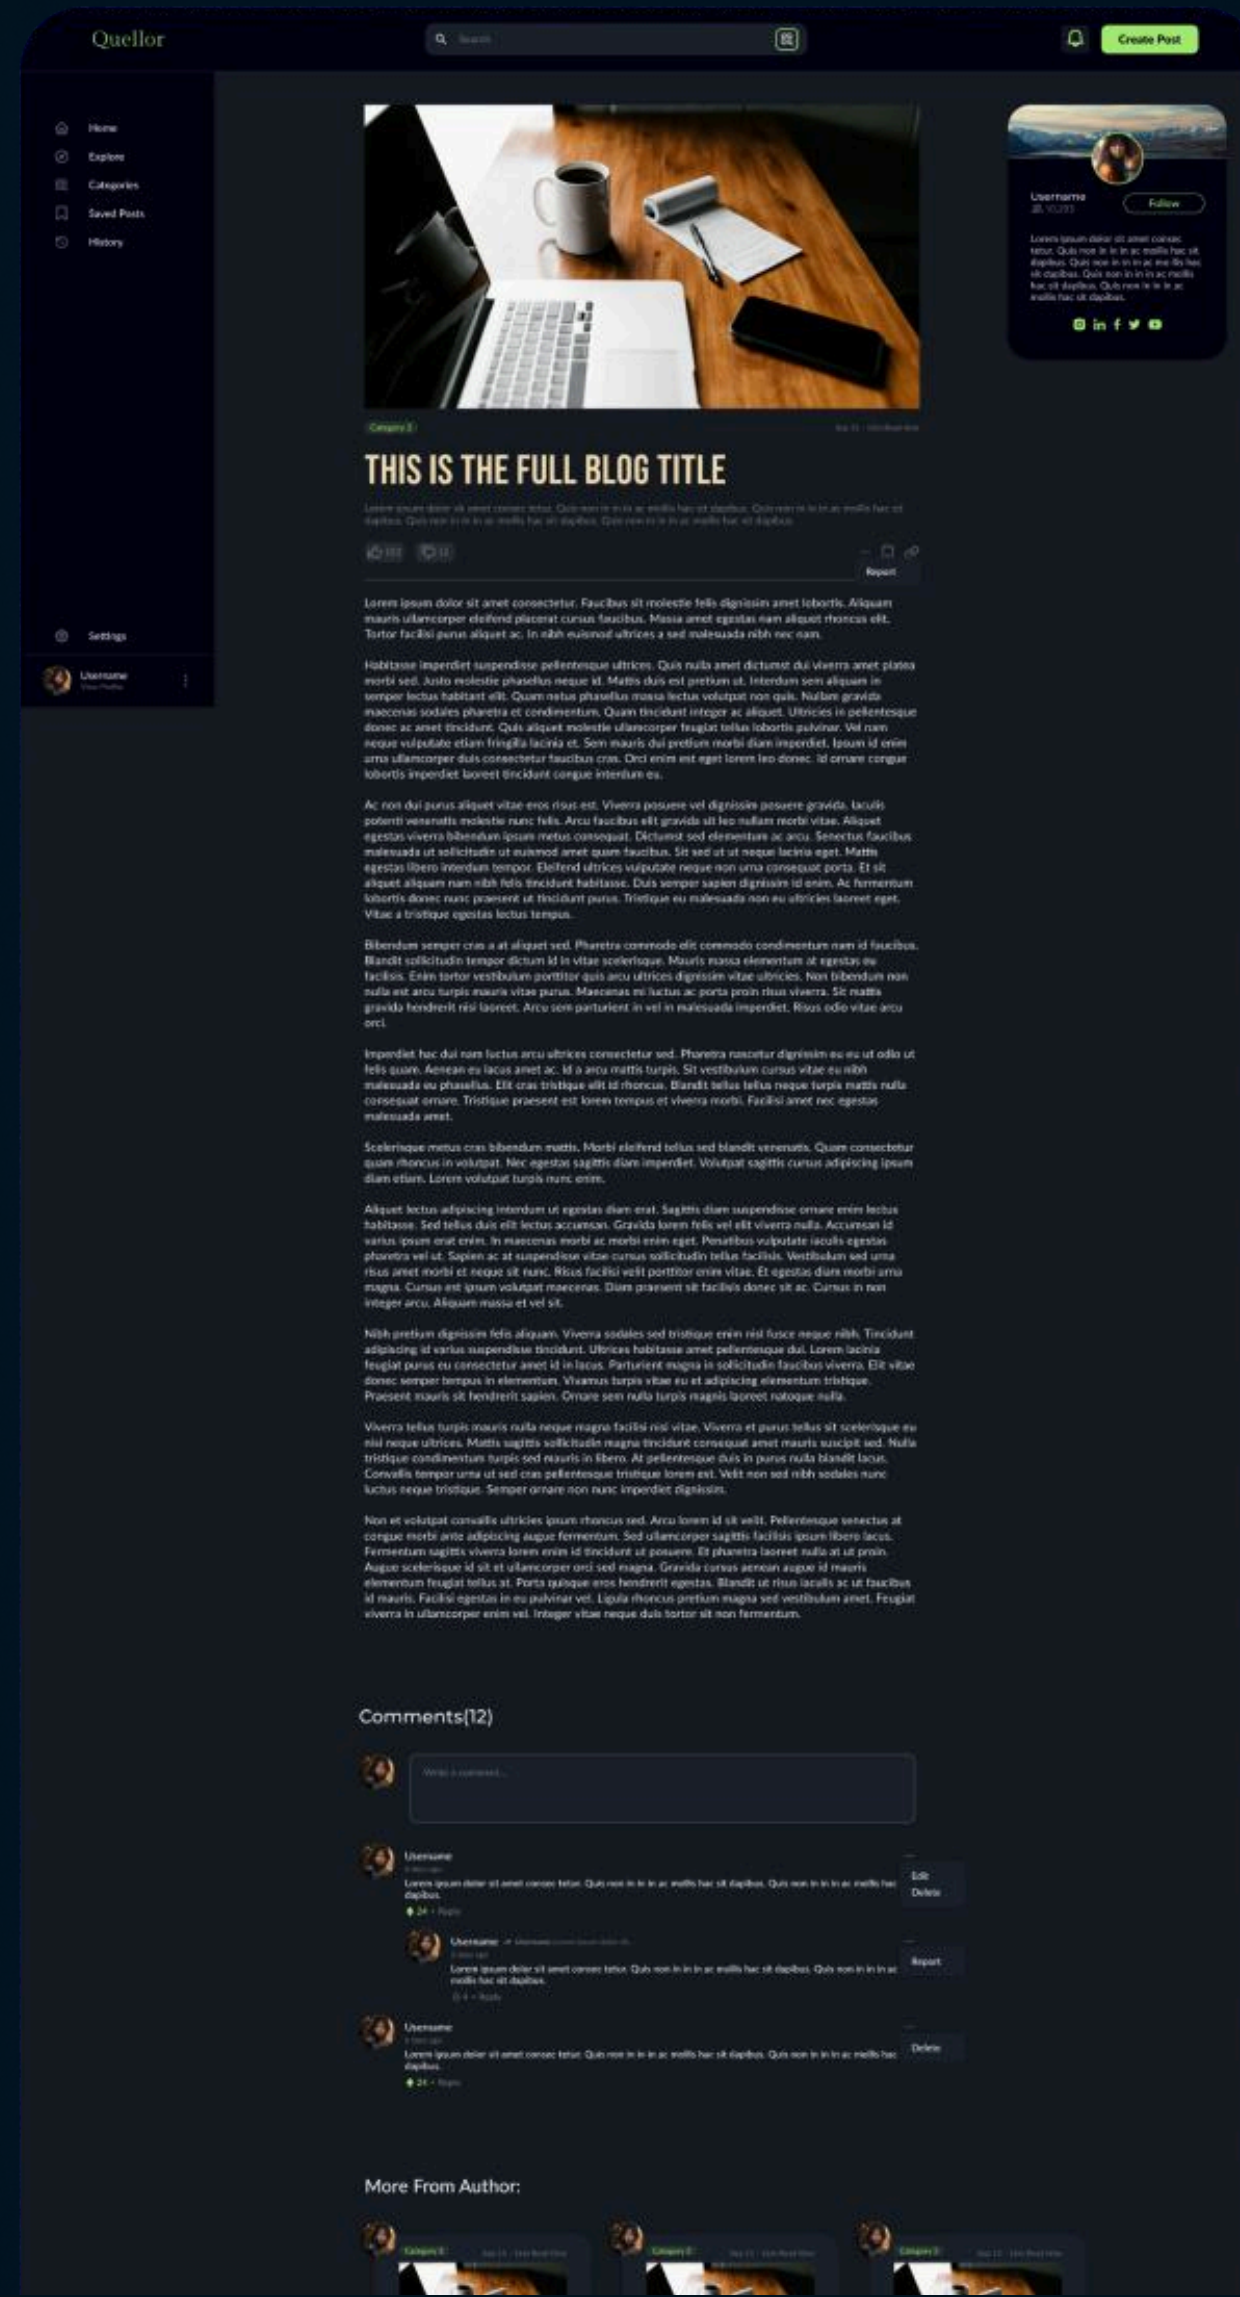

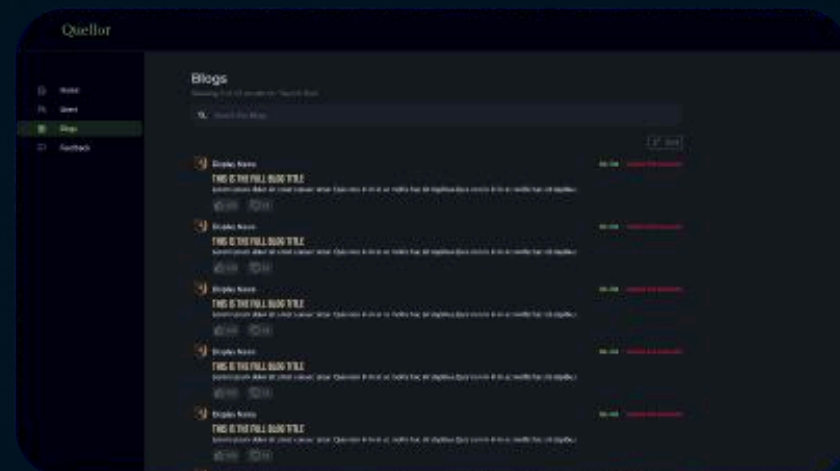

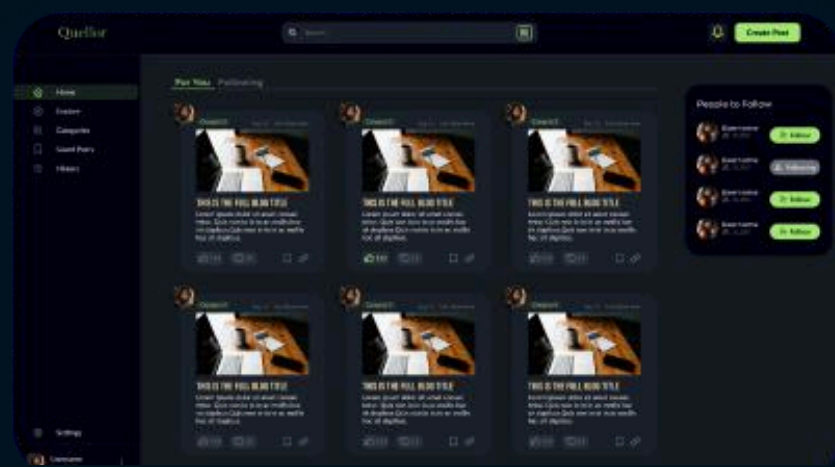

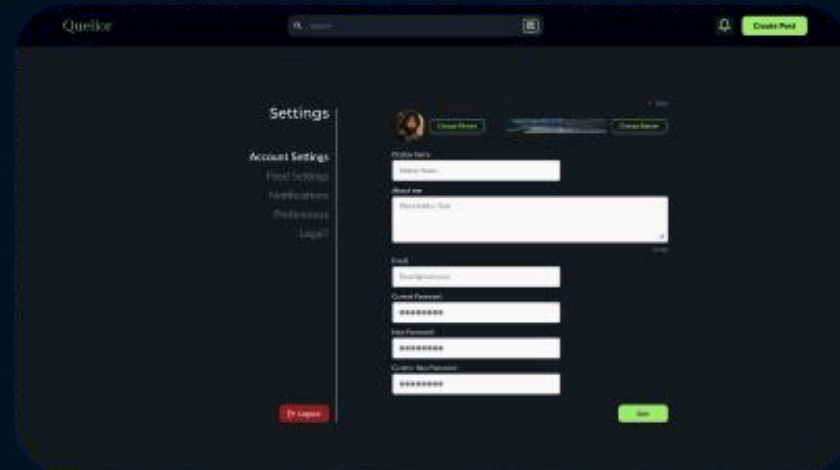

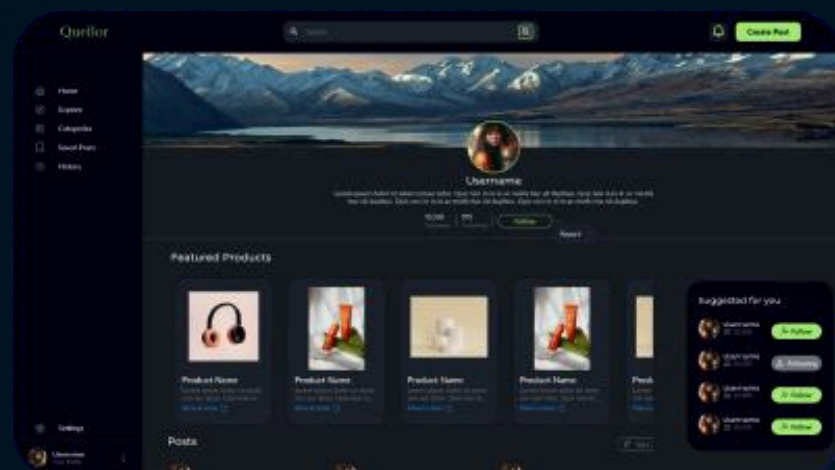

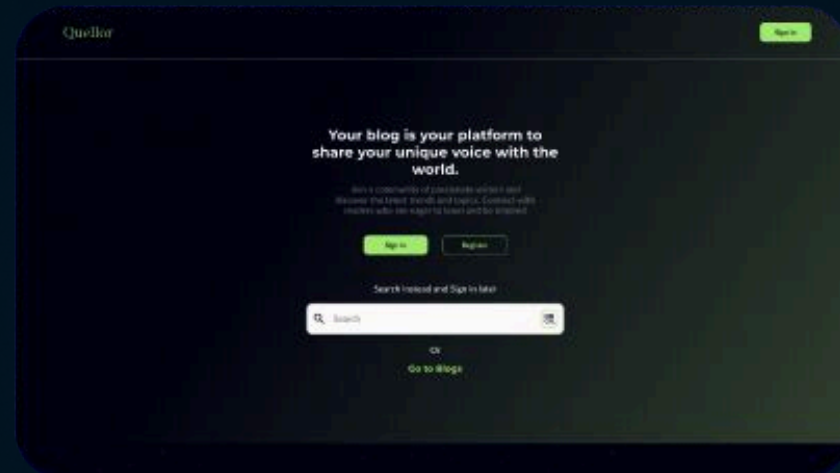

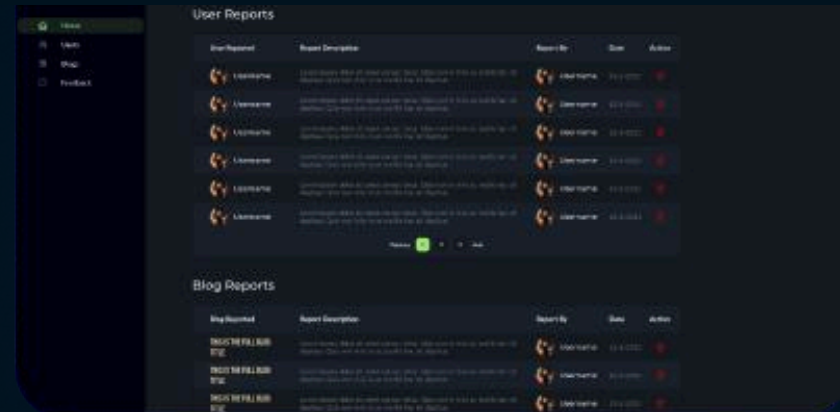

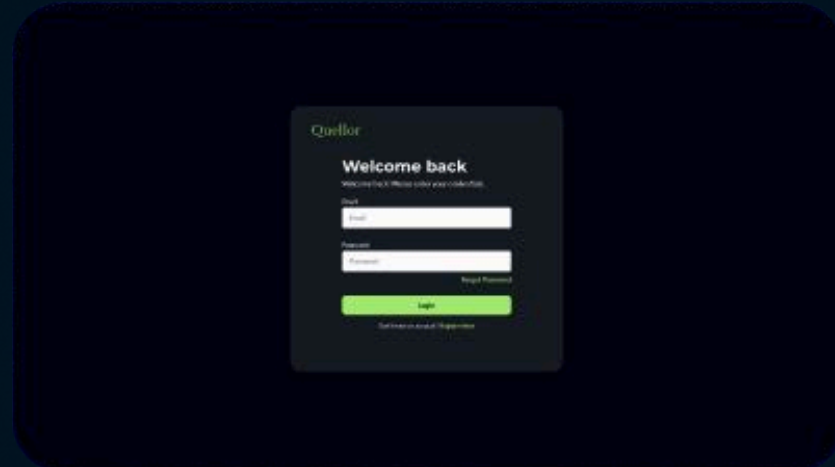

Some of our previous work:

UPLO:

A minimalist e-commerce platform built with aesthetics and functionality in mind. Designed for a brand that prioritizes clean, modern visuals, Uplo delivers a seamless shopping experience while making the brand itself the focal point. Developed end-to-end with an emphasis on design-first principles.

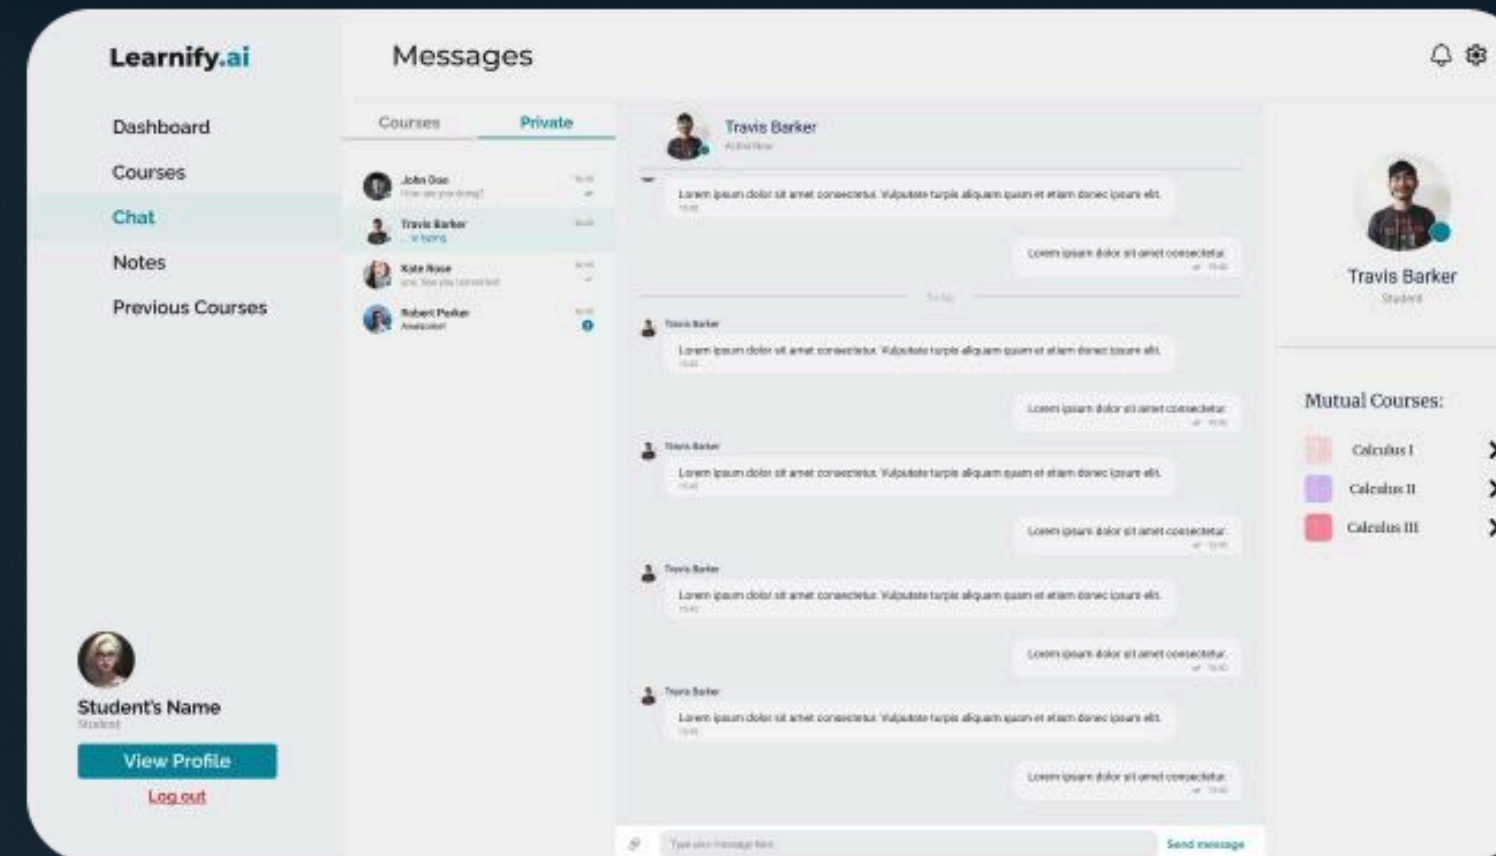

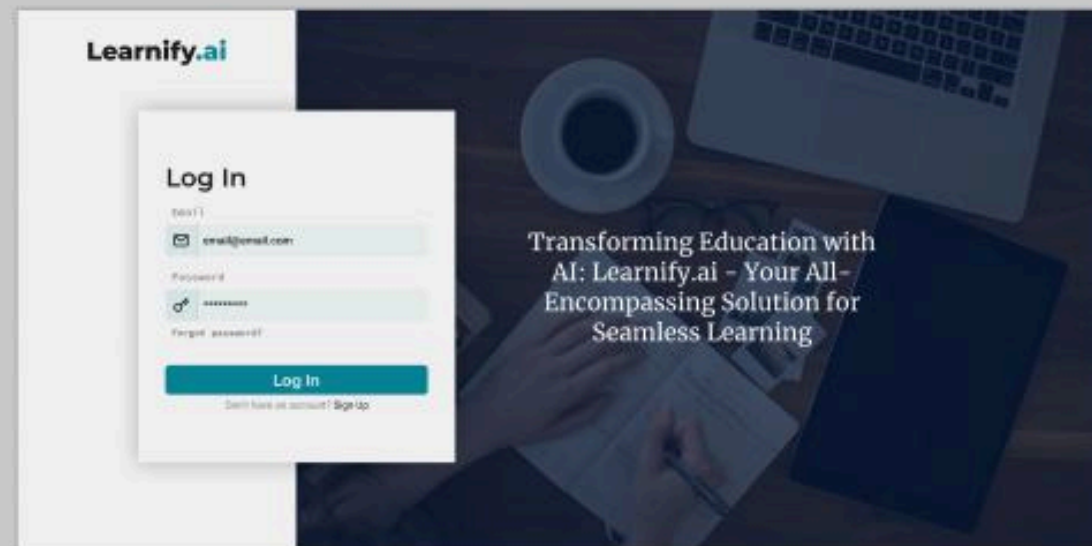

Some of our previous work:

Quellor:

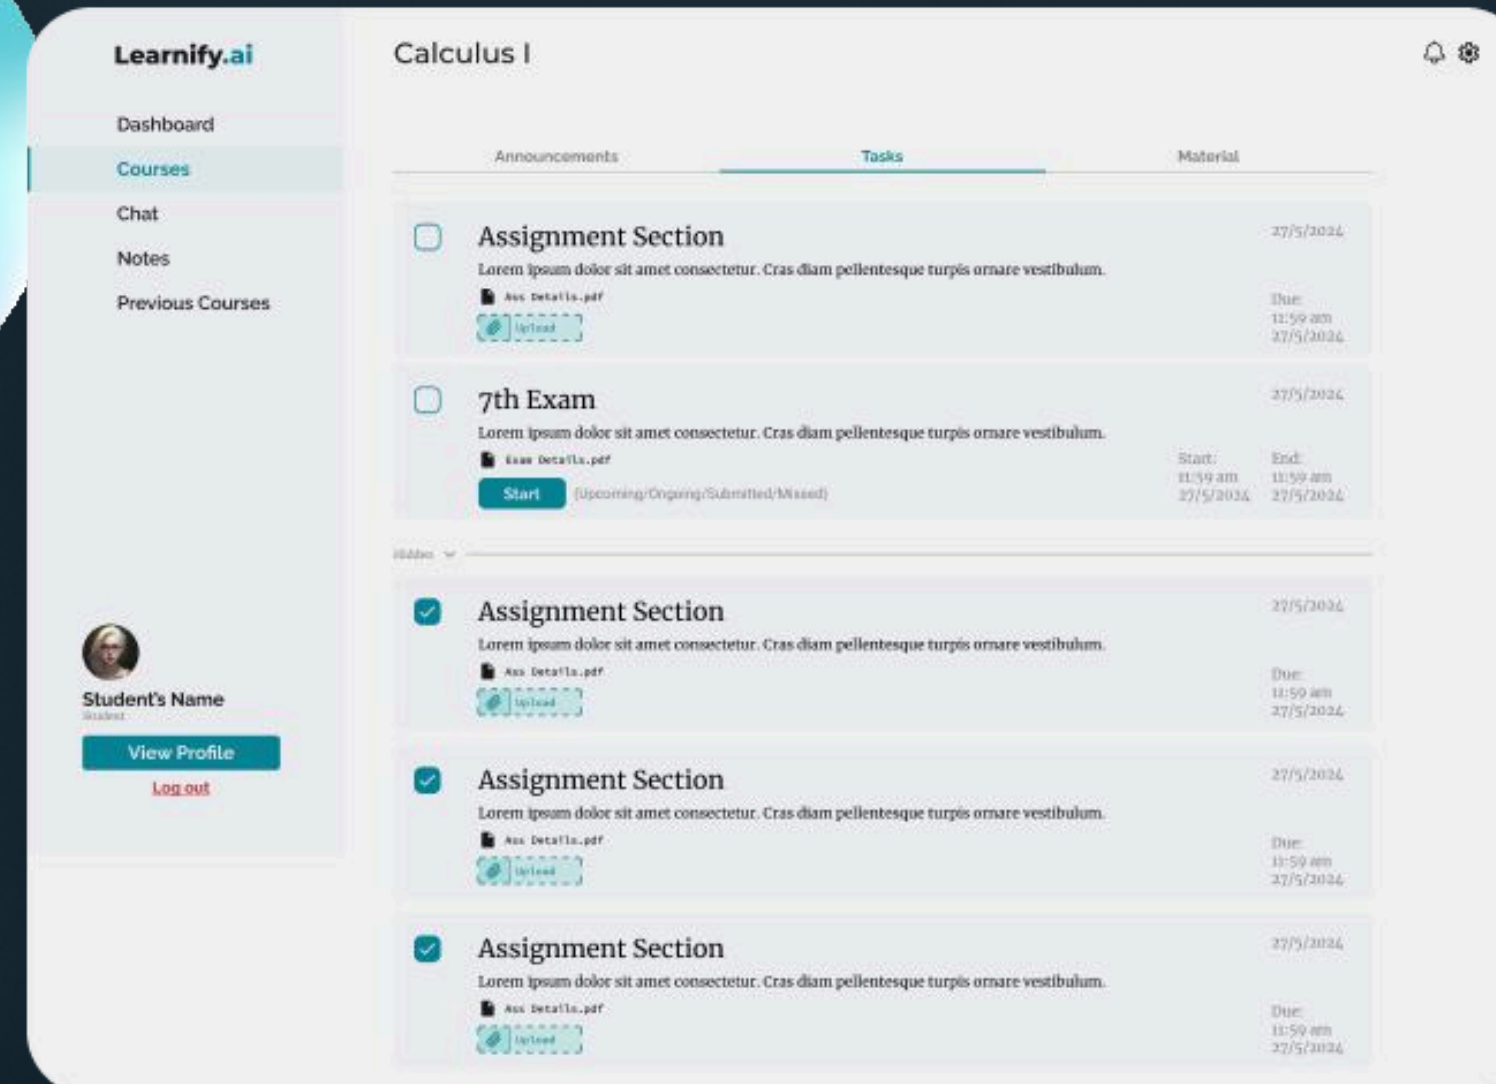

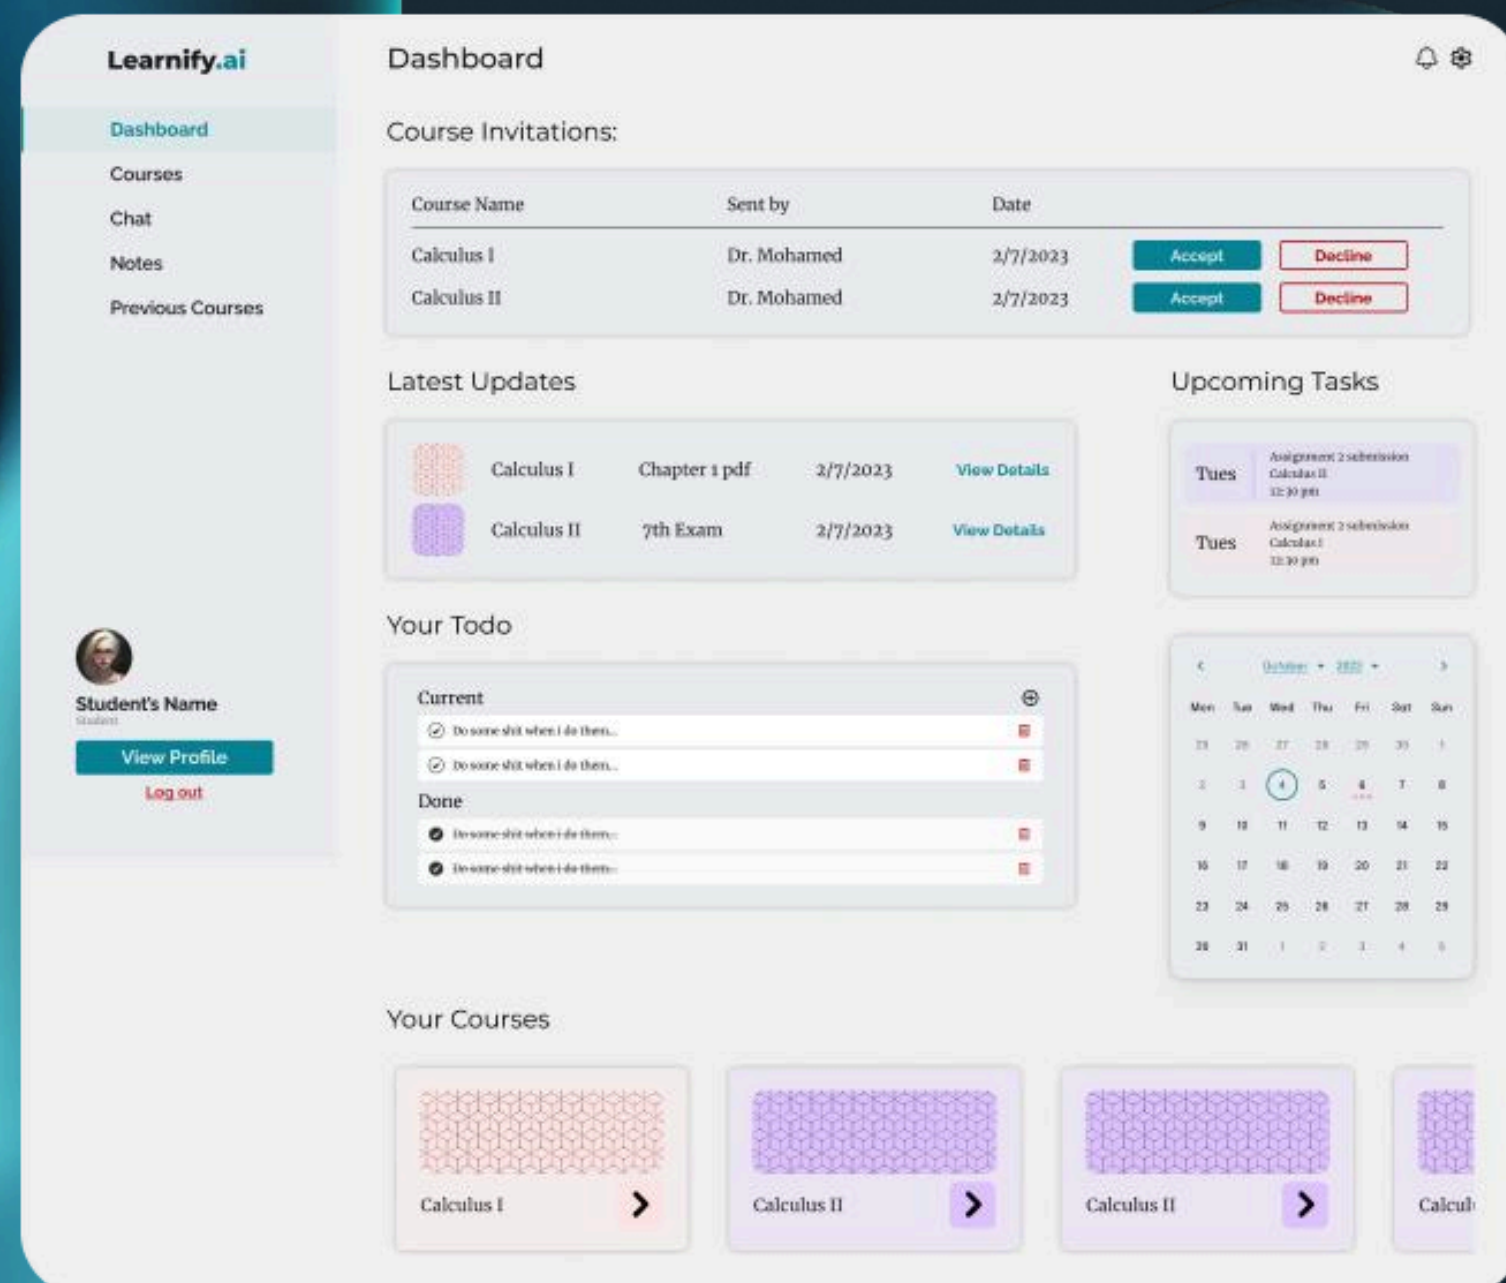

A modern blogging-based social media platform designed to empower creators. Quellor encourages users to share their thoughts, stories, and news in a long-form format, providing an alternative to the dominance of short-form content.

Some of our previous work:

Learnify.ai:

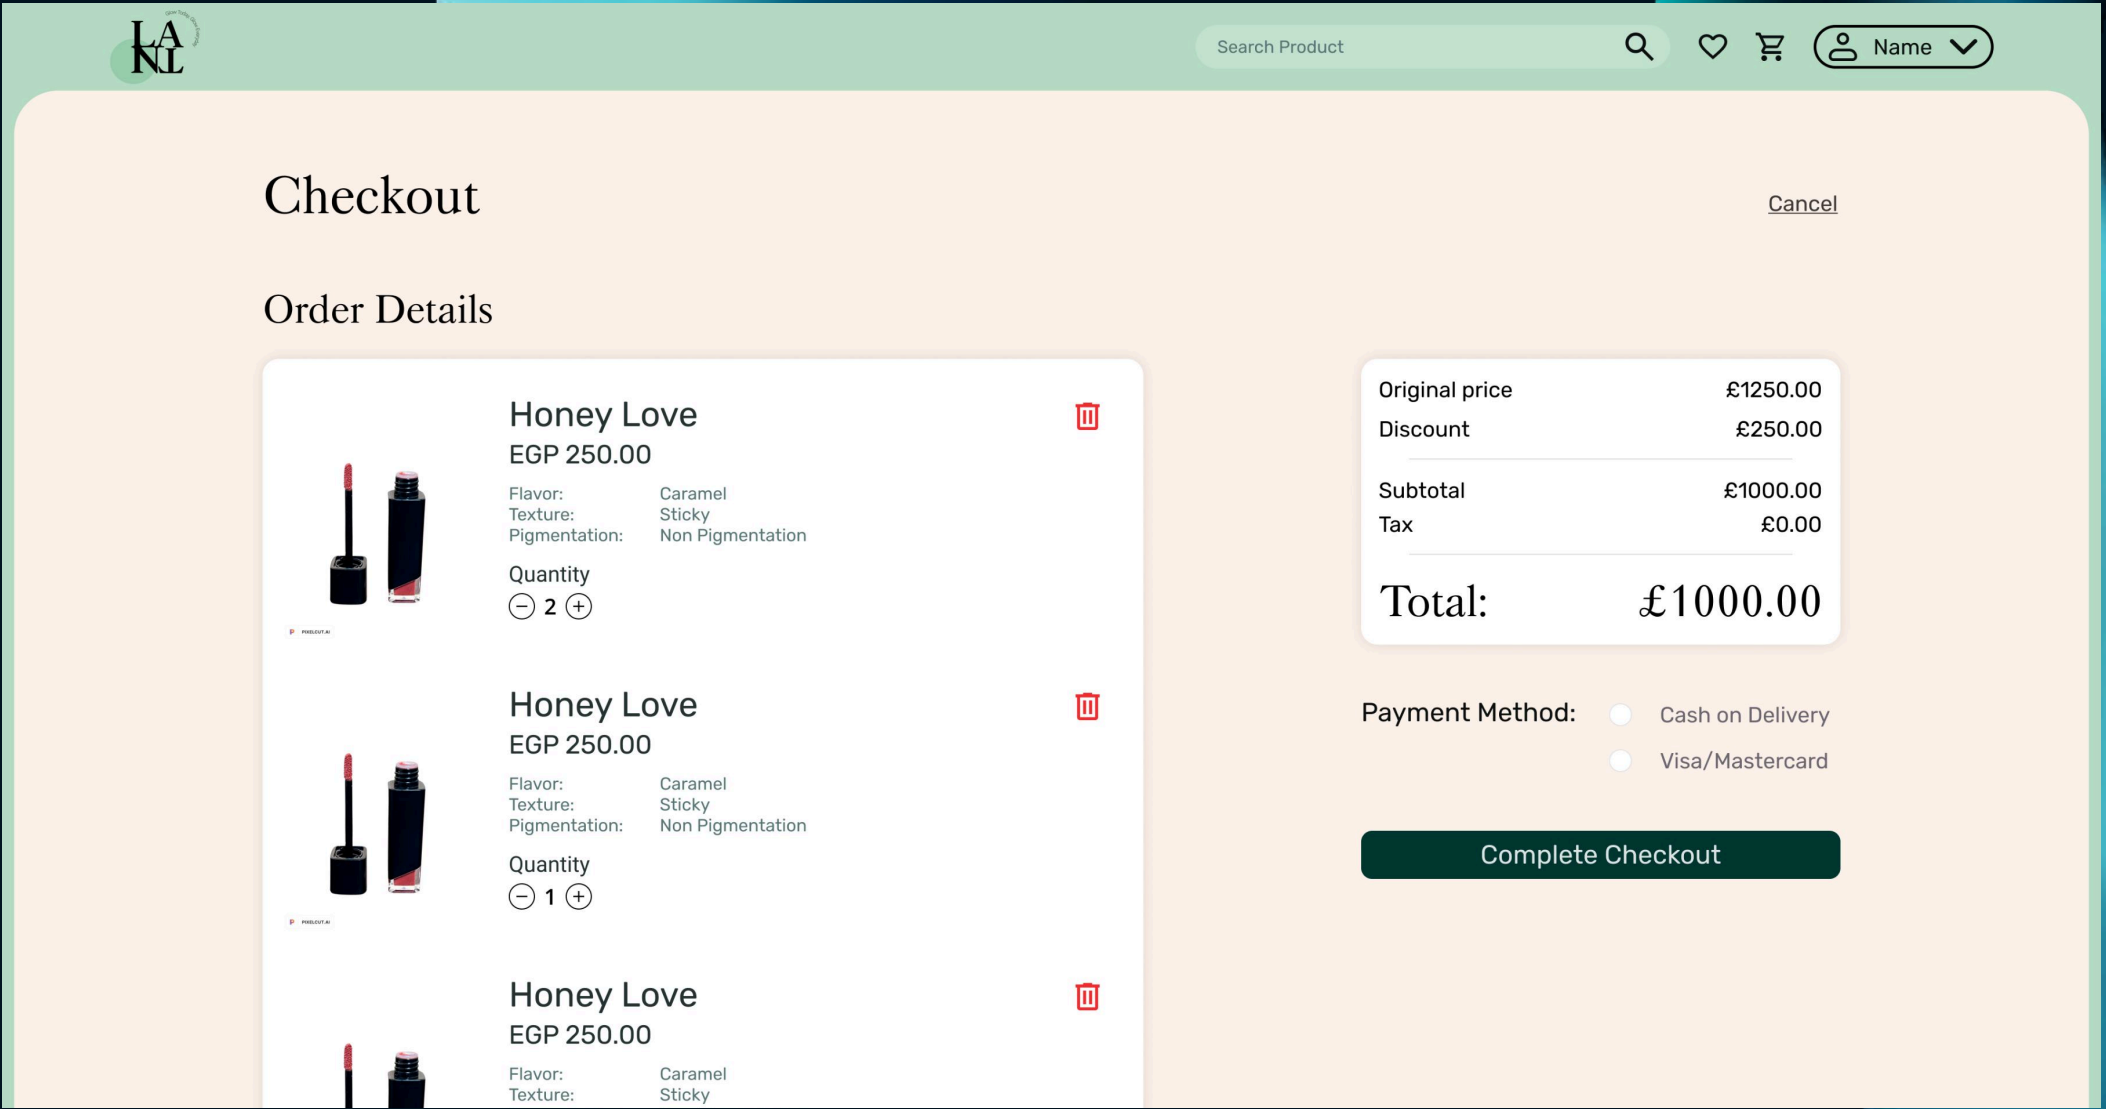

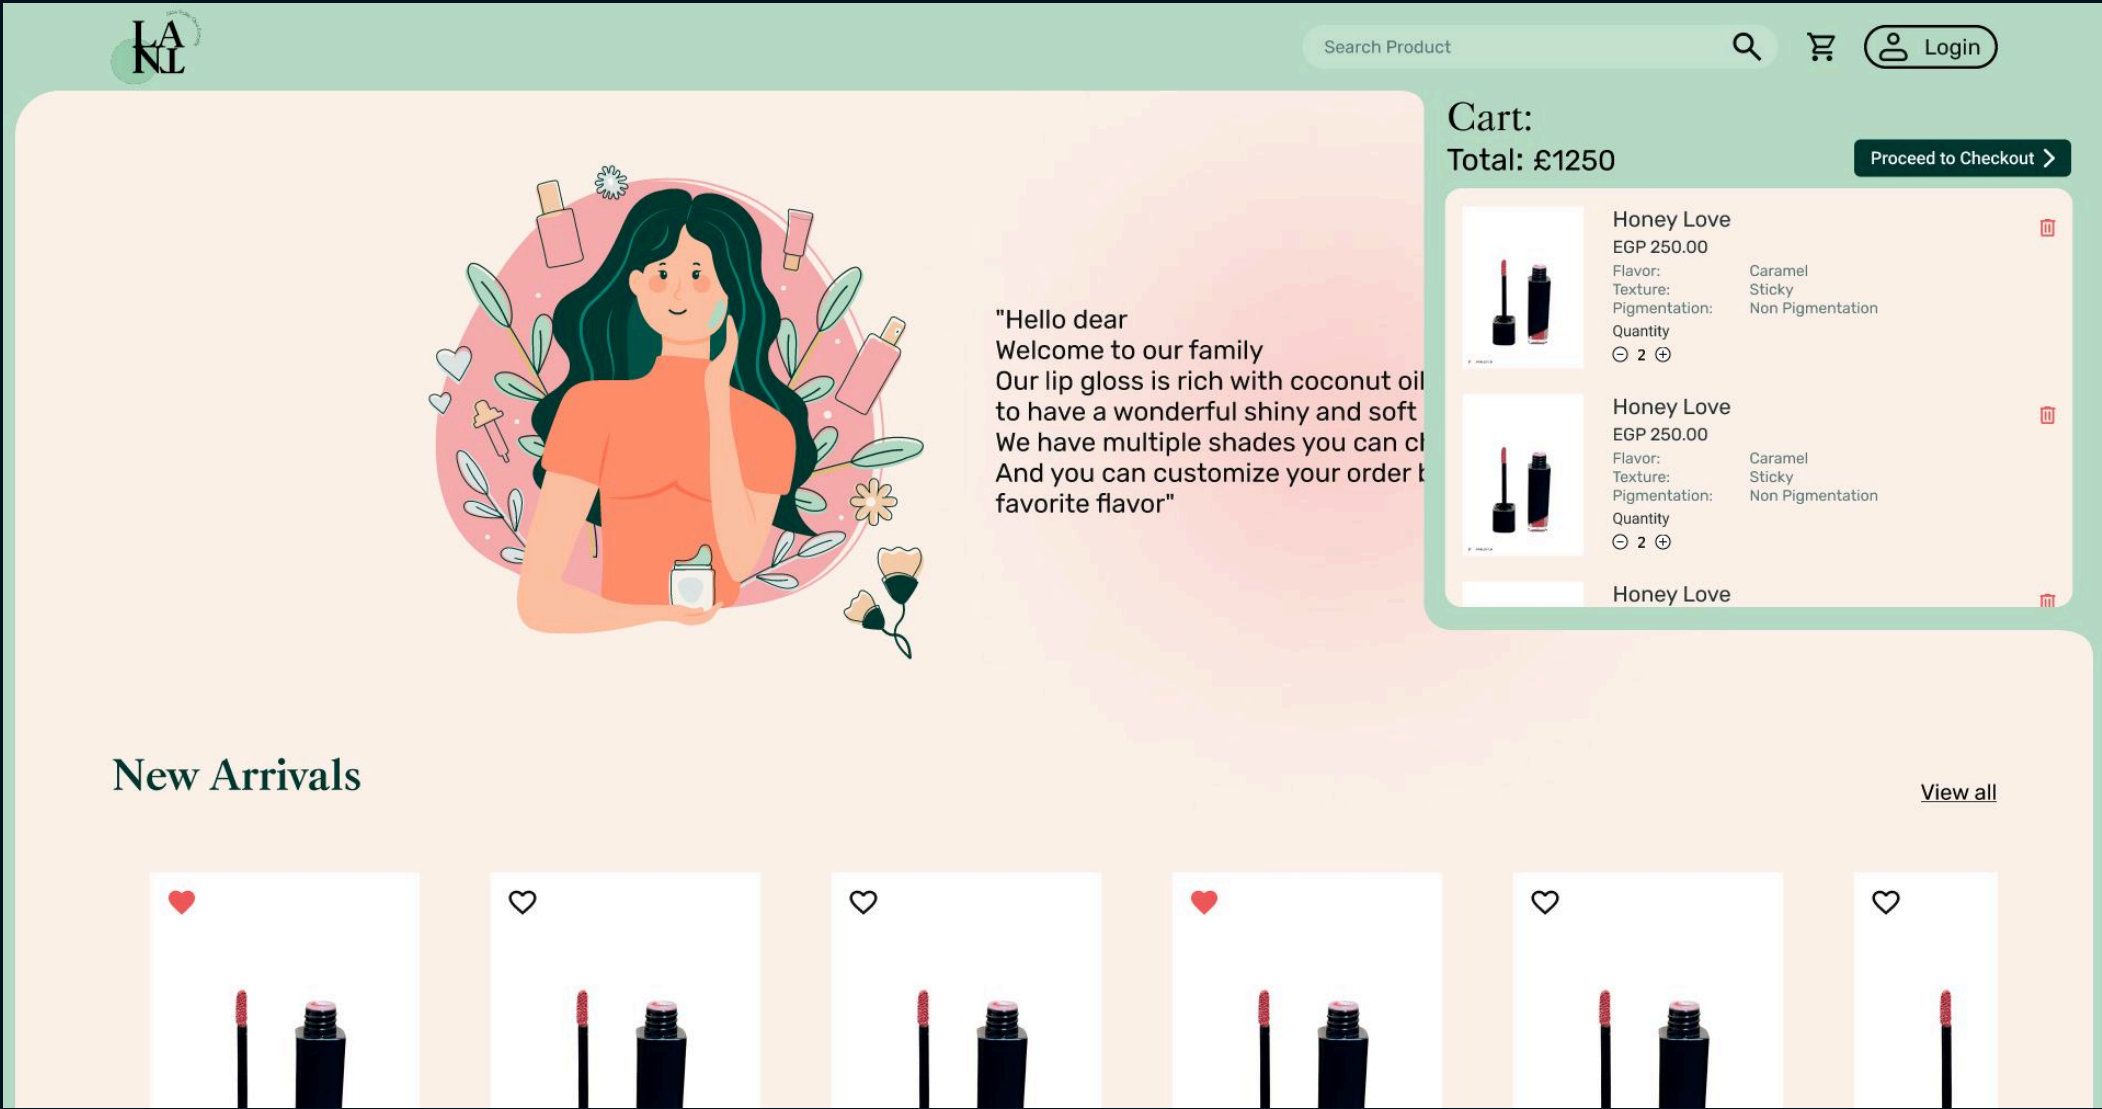

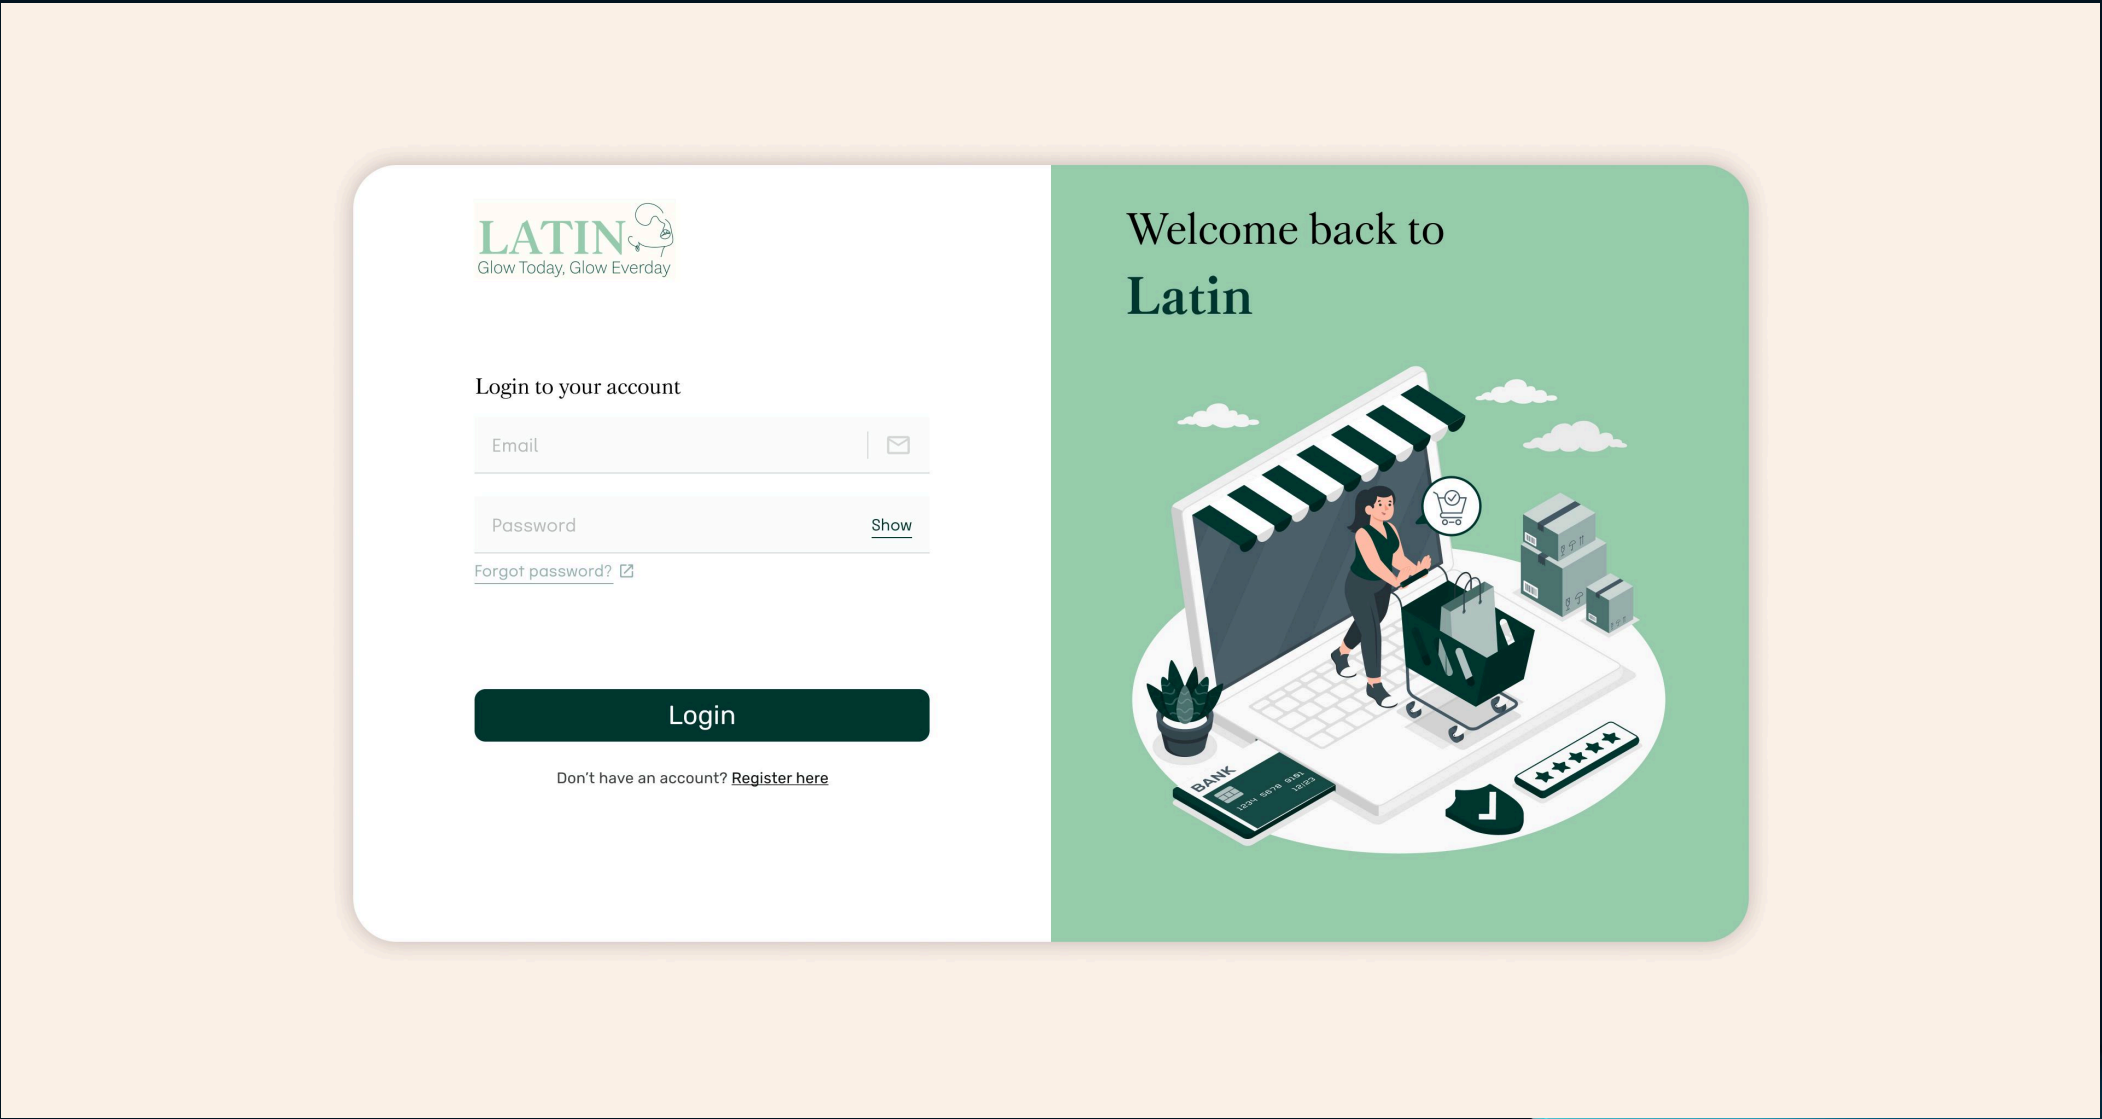

A next-generation LMS designed for universities, enhanced with AI-powered tools to assist both students and professors. This SaaS solution is fully developed but currently on hold due to unforeseen launch-phase complications.

Some of our previous work:

Latin fashion brand:

A beauty and fashion brand specializing in lip gloss and makeup products. To complement its chic and stylish identity, we developed a sleek and elegant e-commerce platform that enhances the brand's aesthetic and delivers a seamless shopping experience.

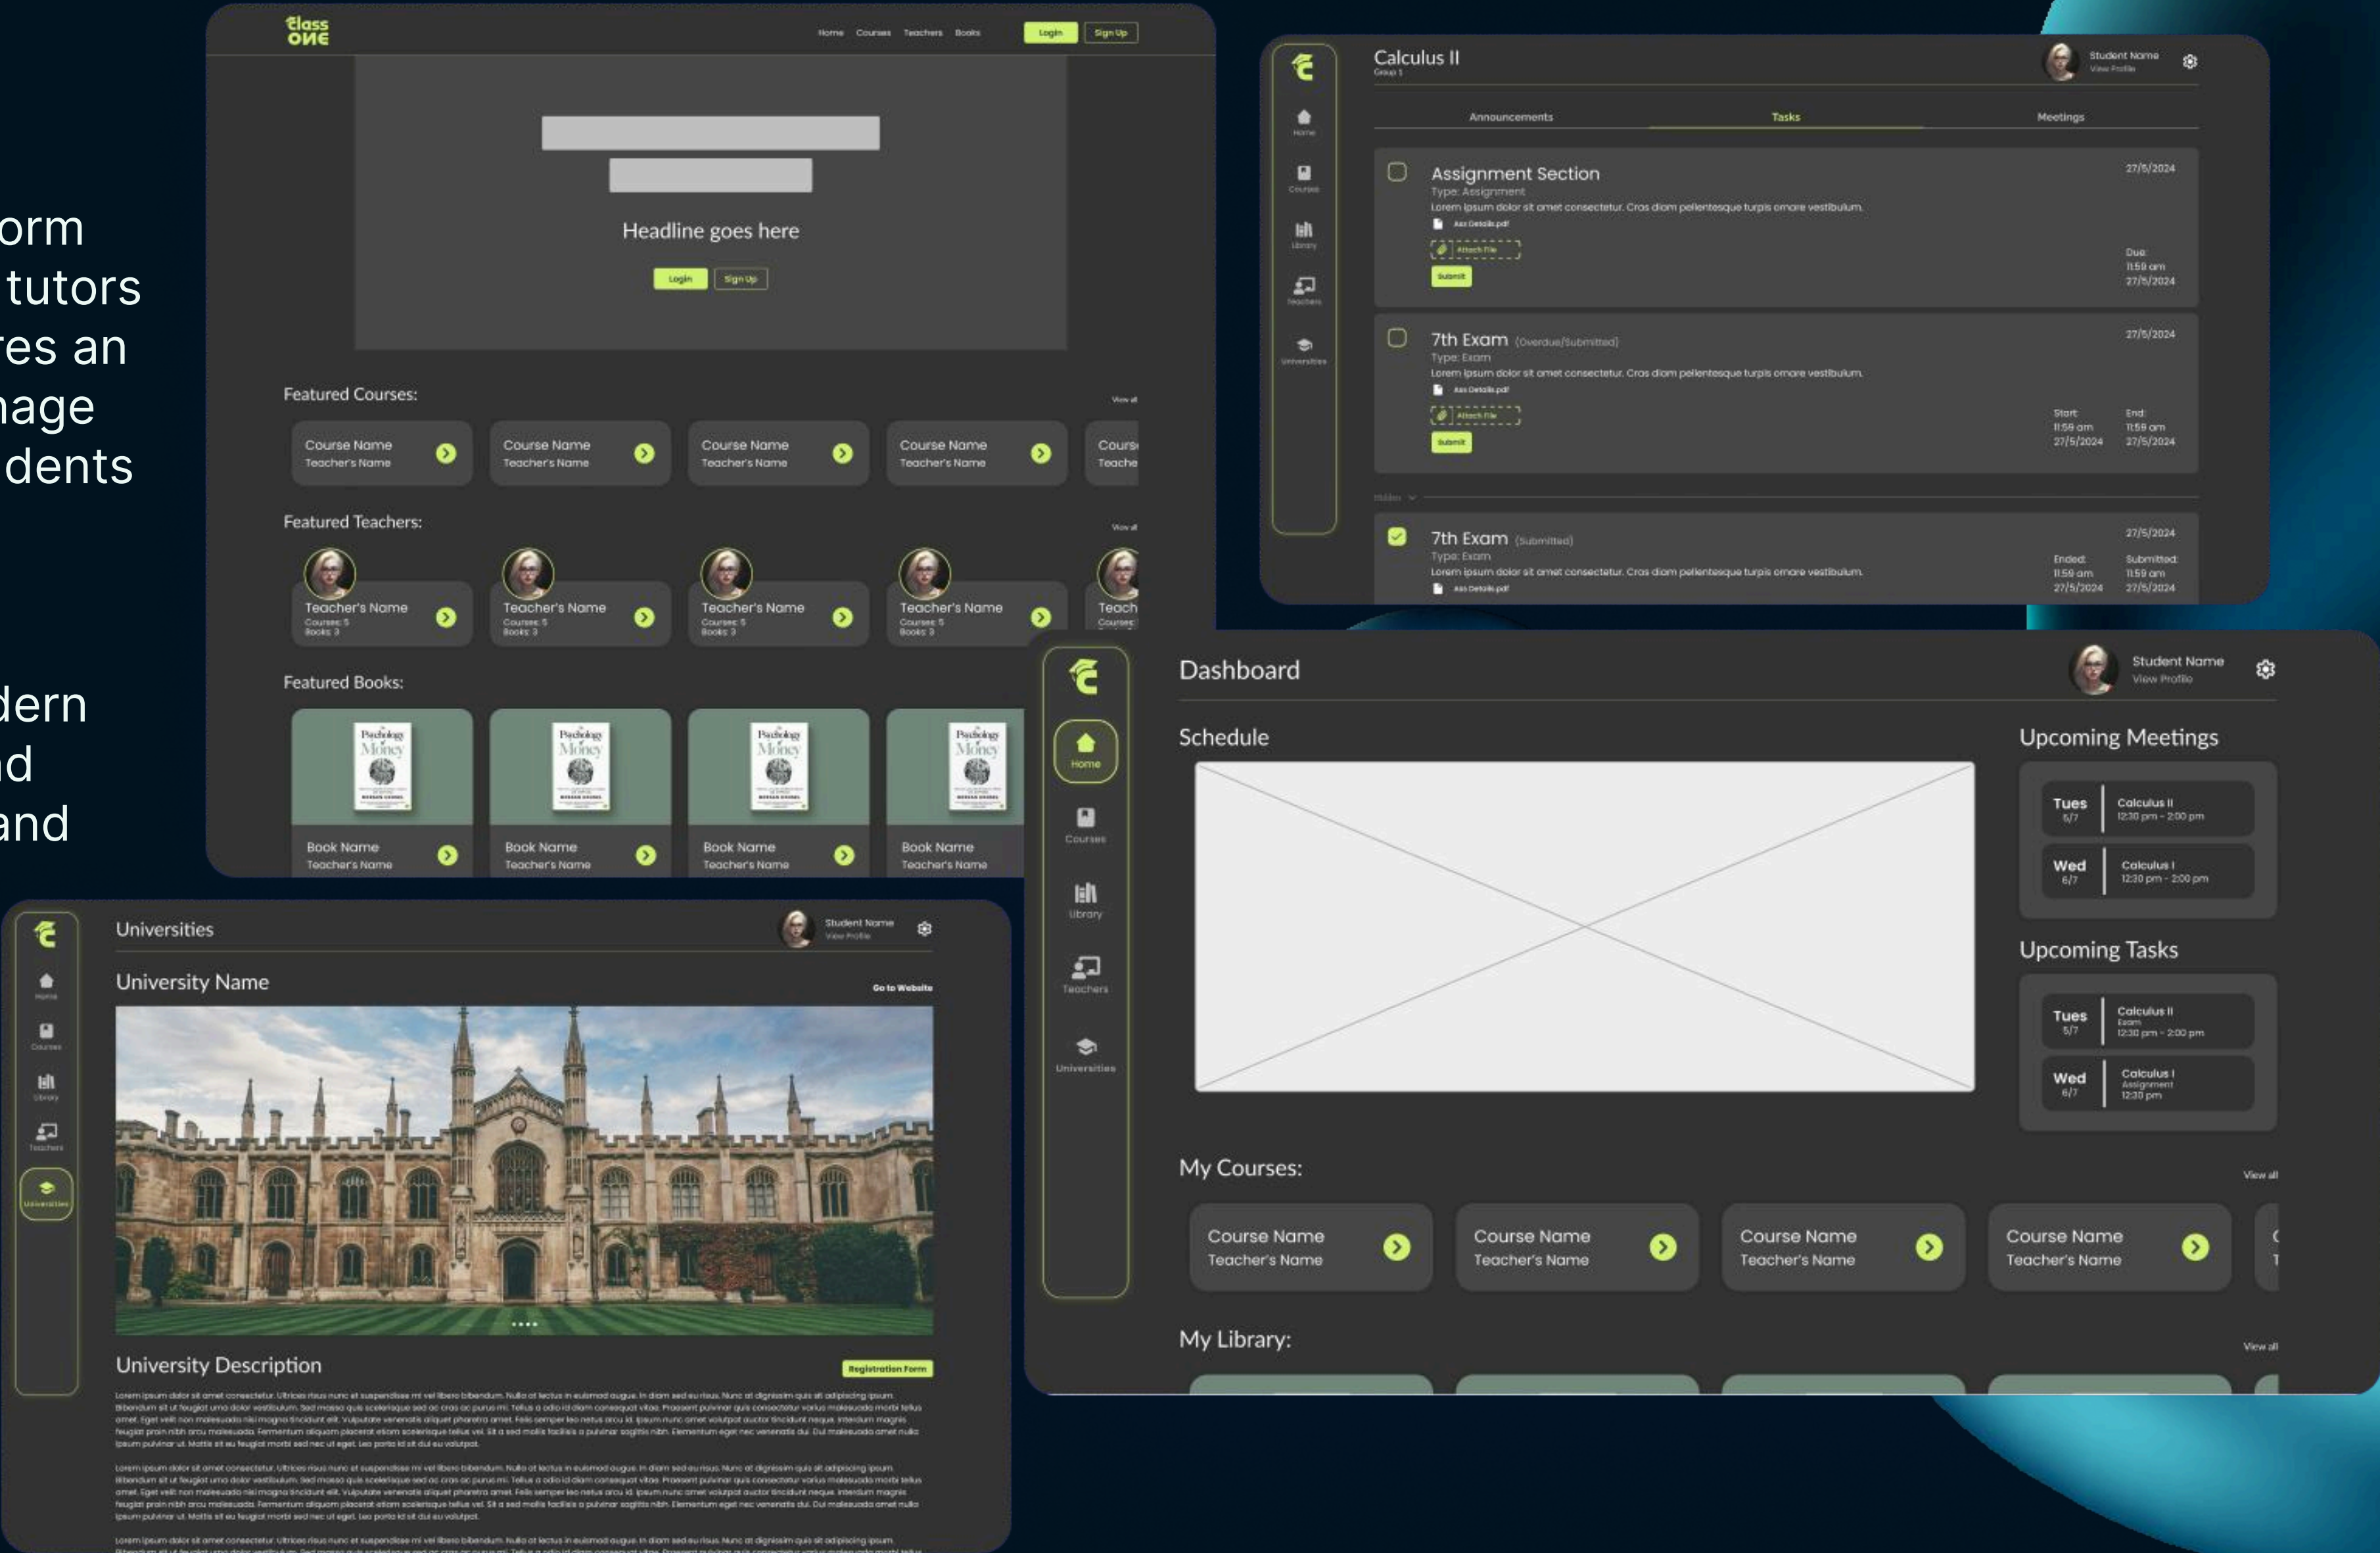

Some of our previous work:

Class One:

An Egyptian online tutoring platform that connects students with top tutors across various subjects. It features an LMS that allows teachers to manage student groups and provides students with a centralized hub for study materials.

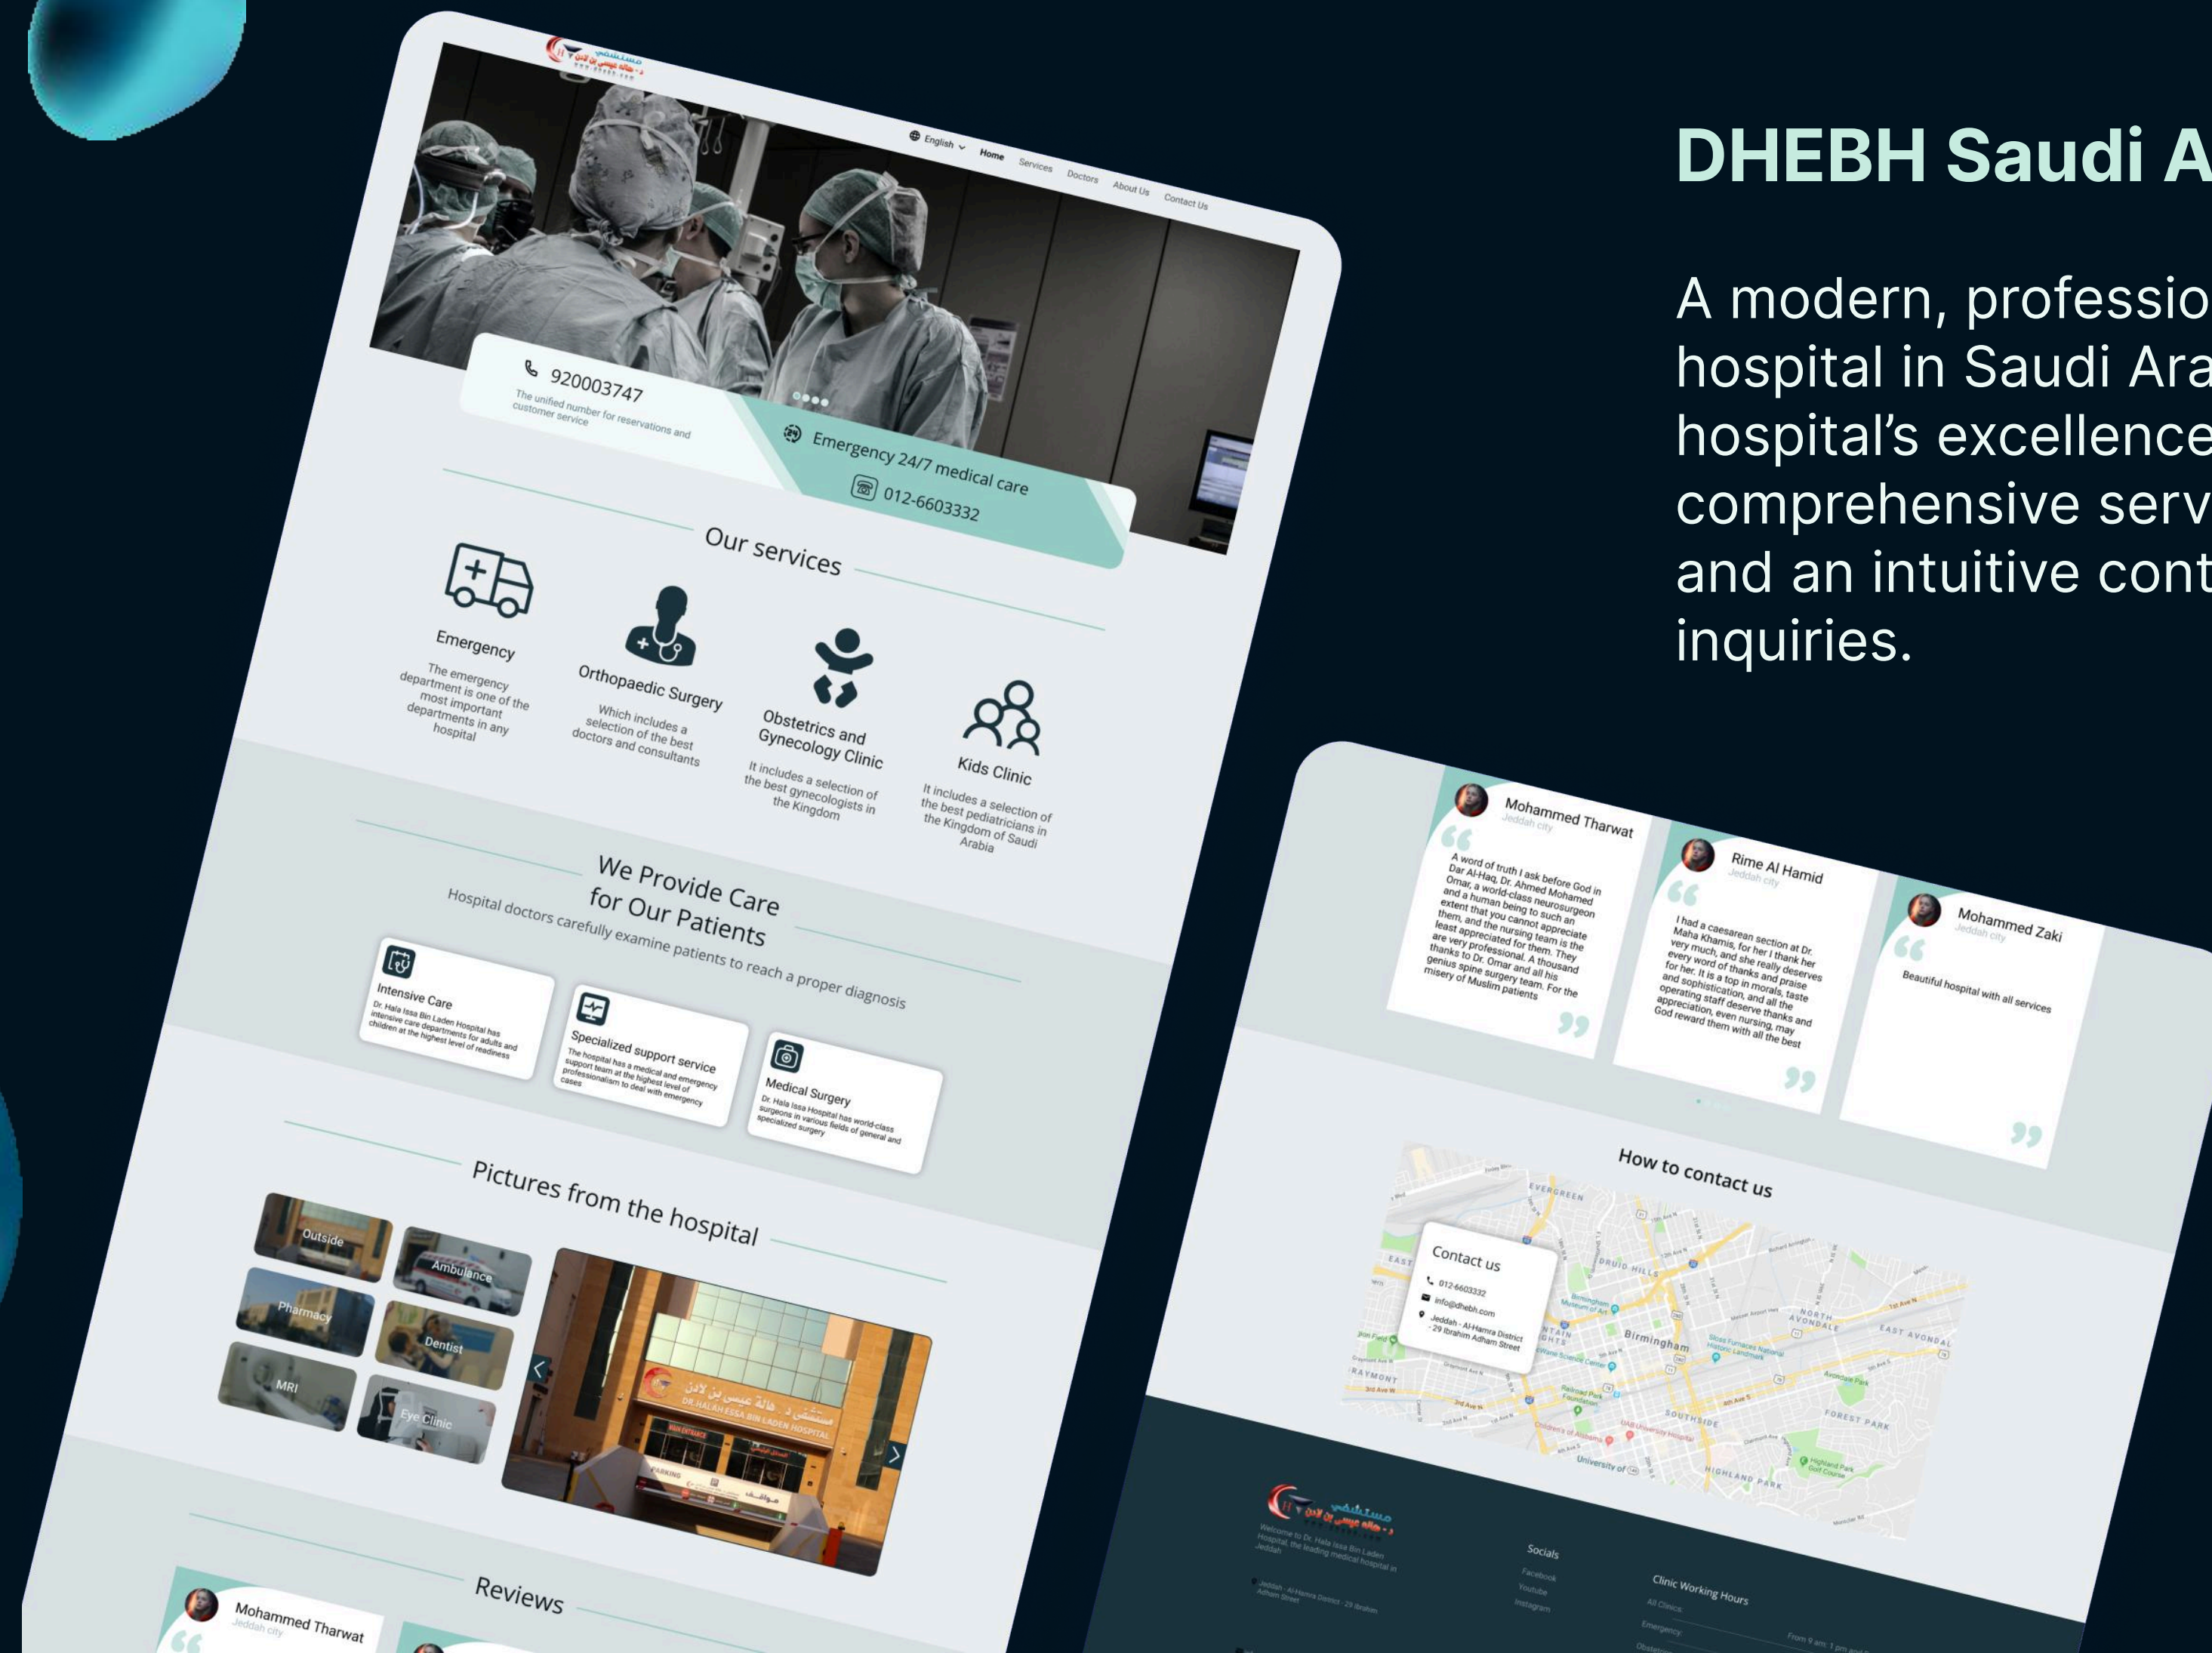

Aurora Tech designed the UI/UX prototype, ensuring a sleek, modern interface that is both intuitive and visually appealing to teenagers and educators.

Some of our previous work:

DHEBH Saudi Arabian Medical Center:

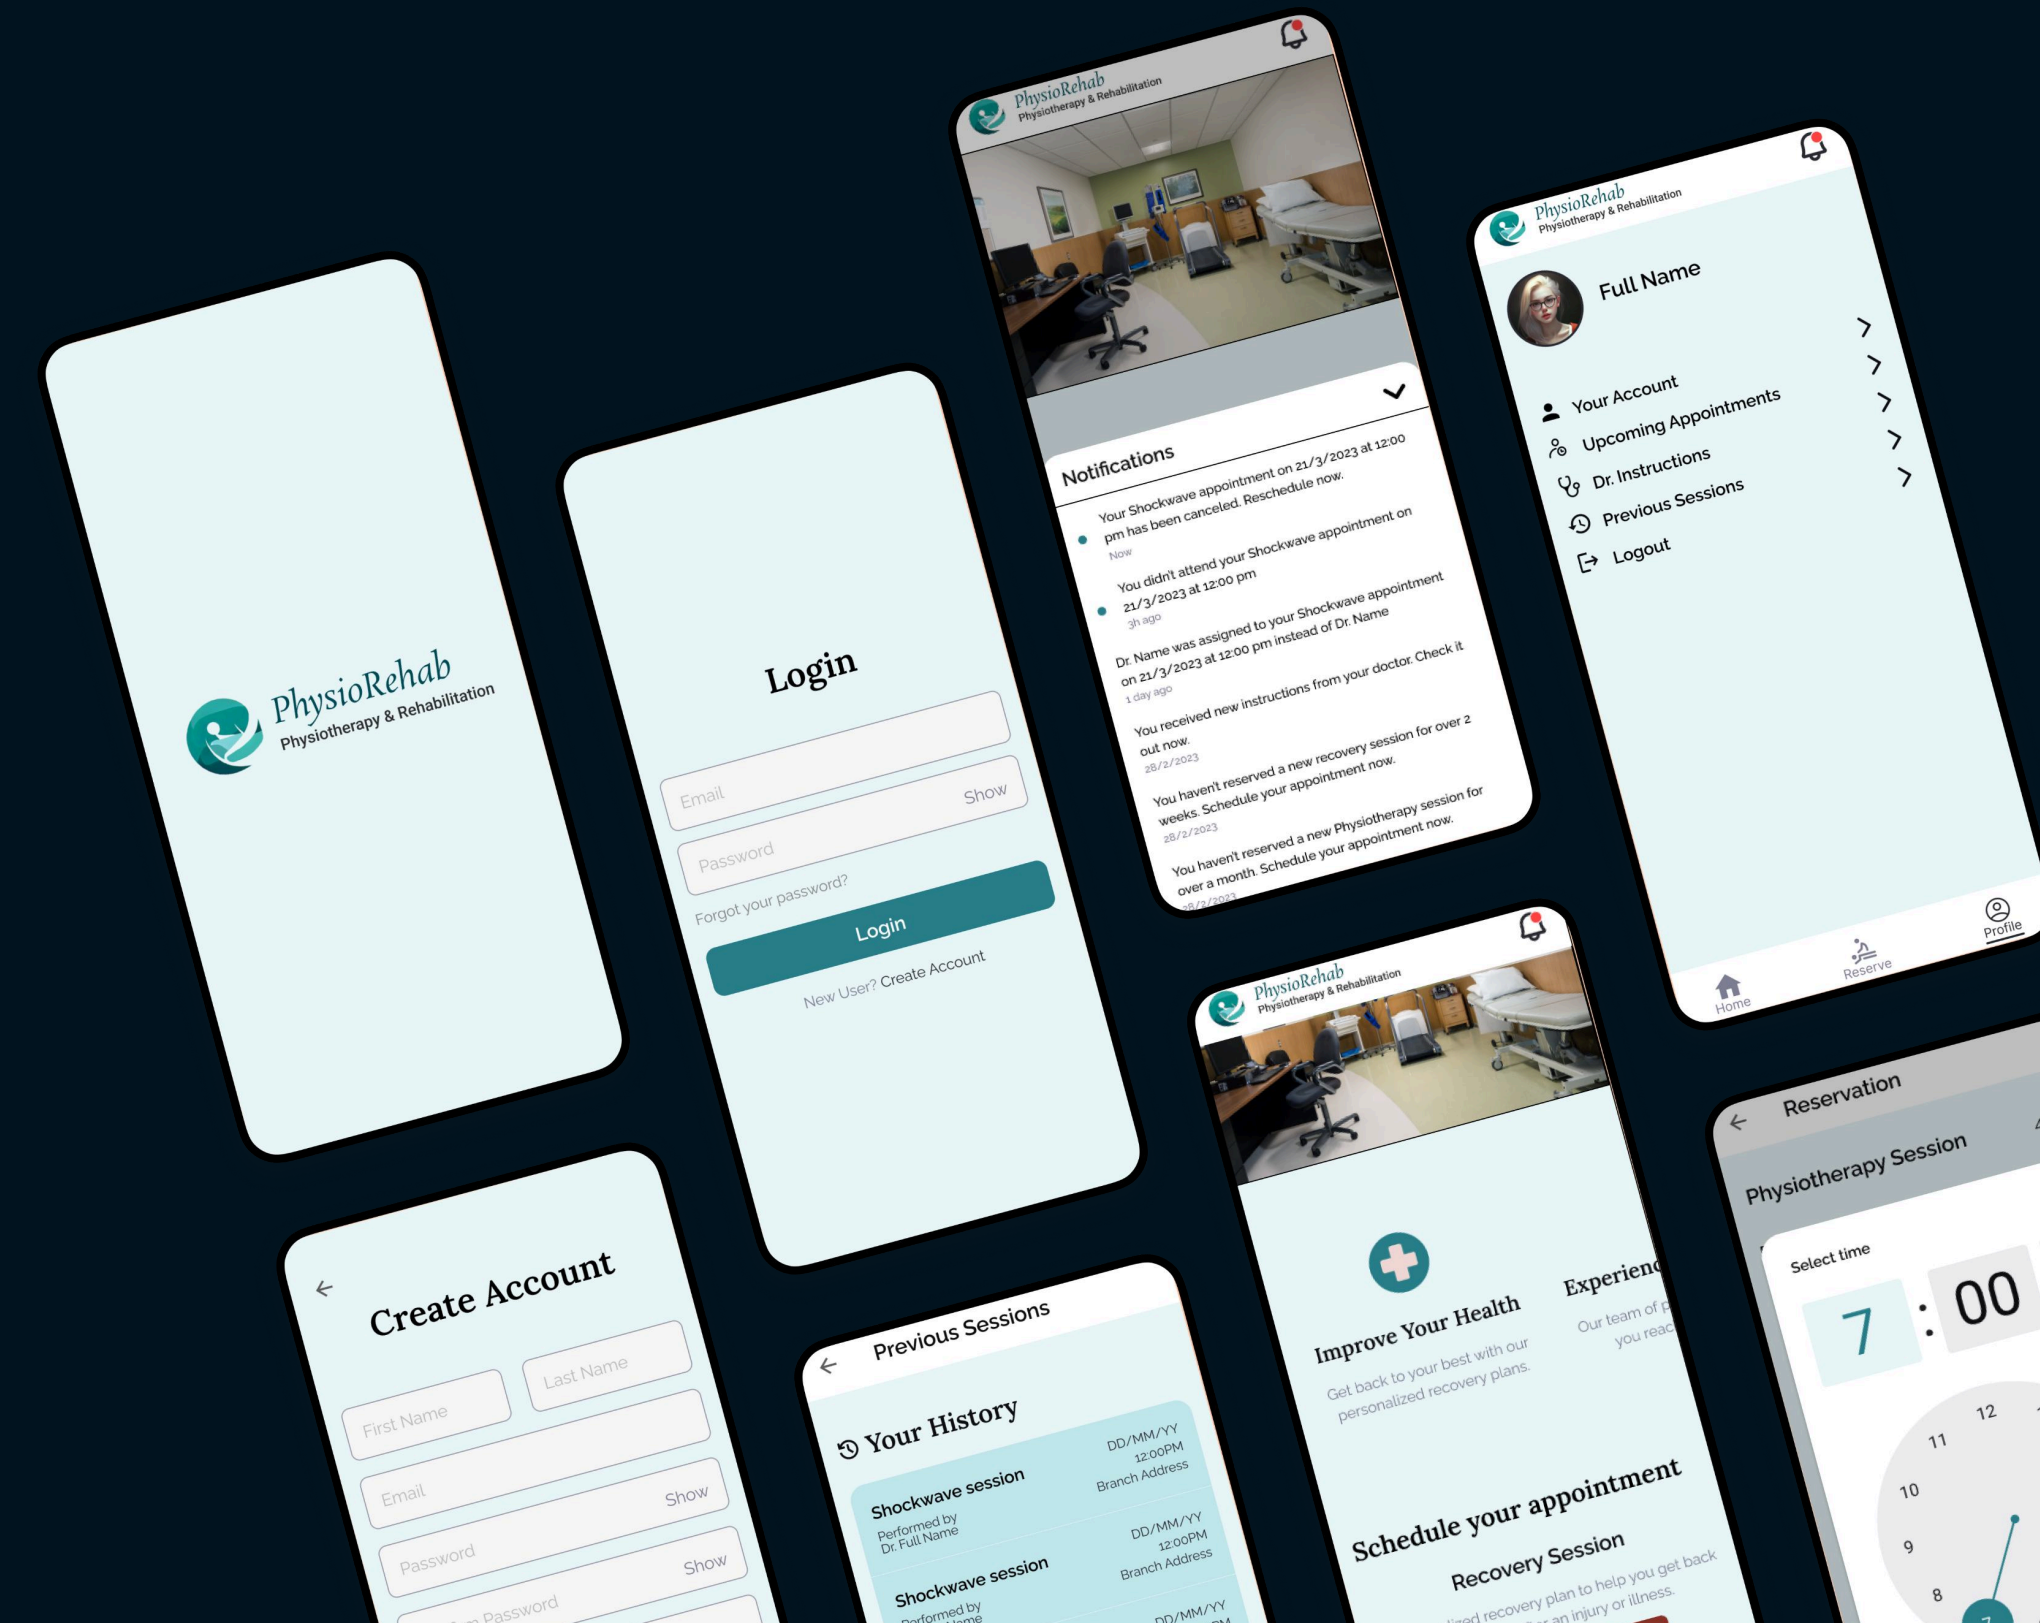

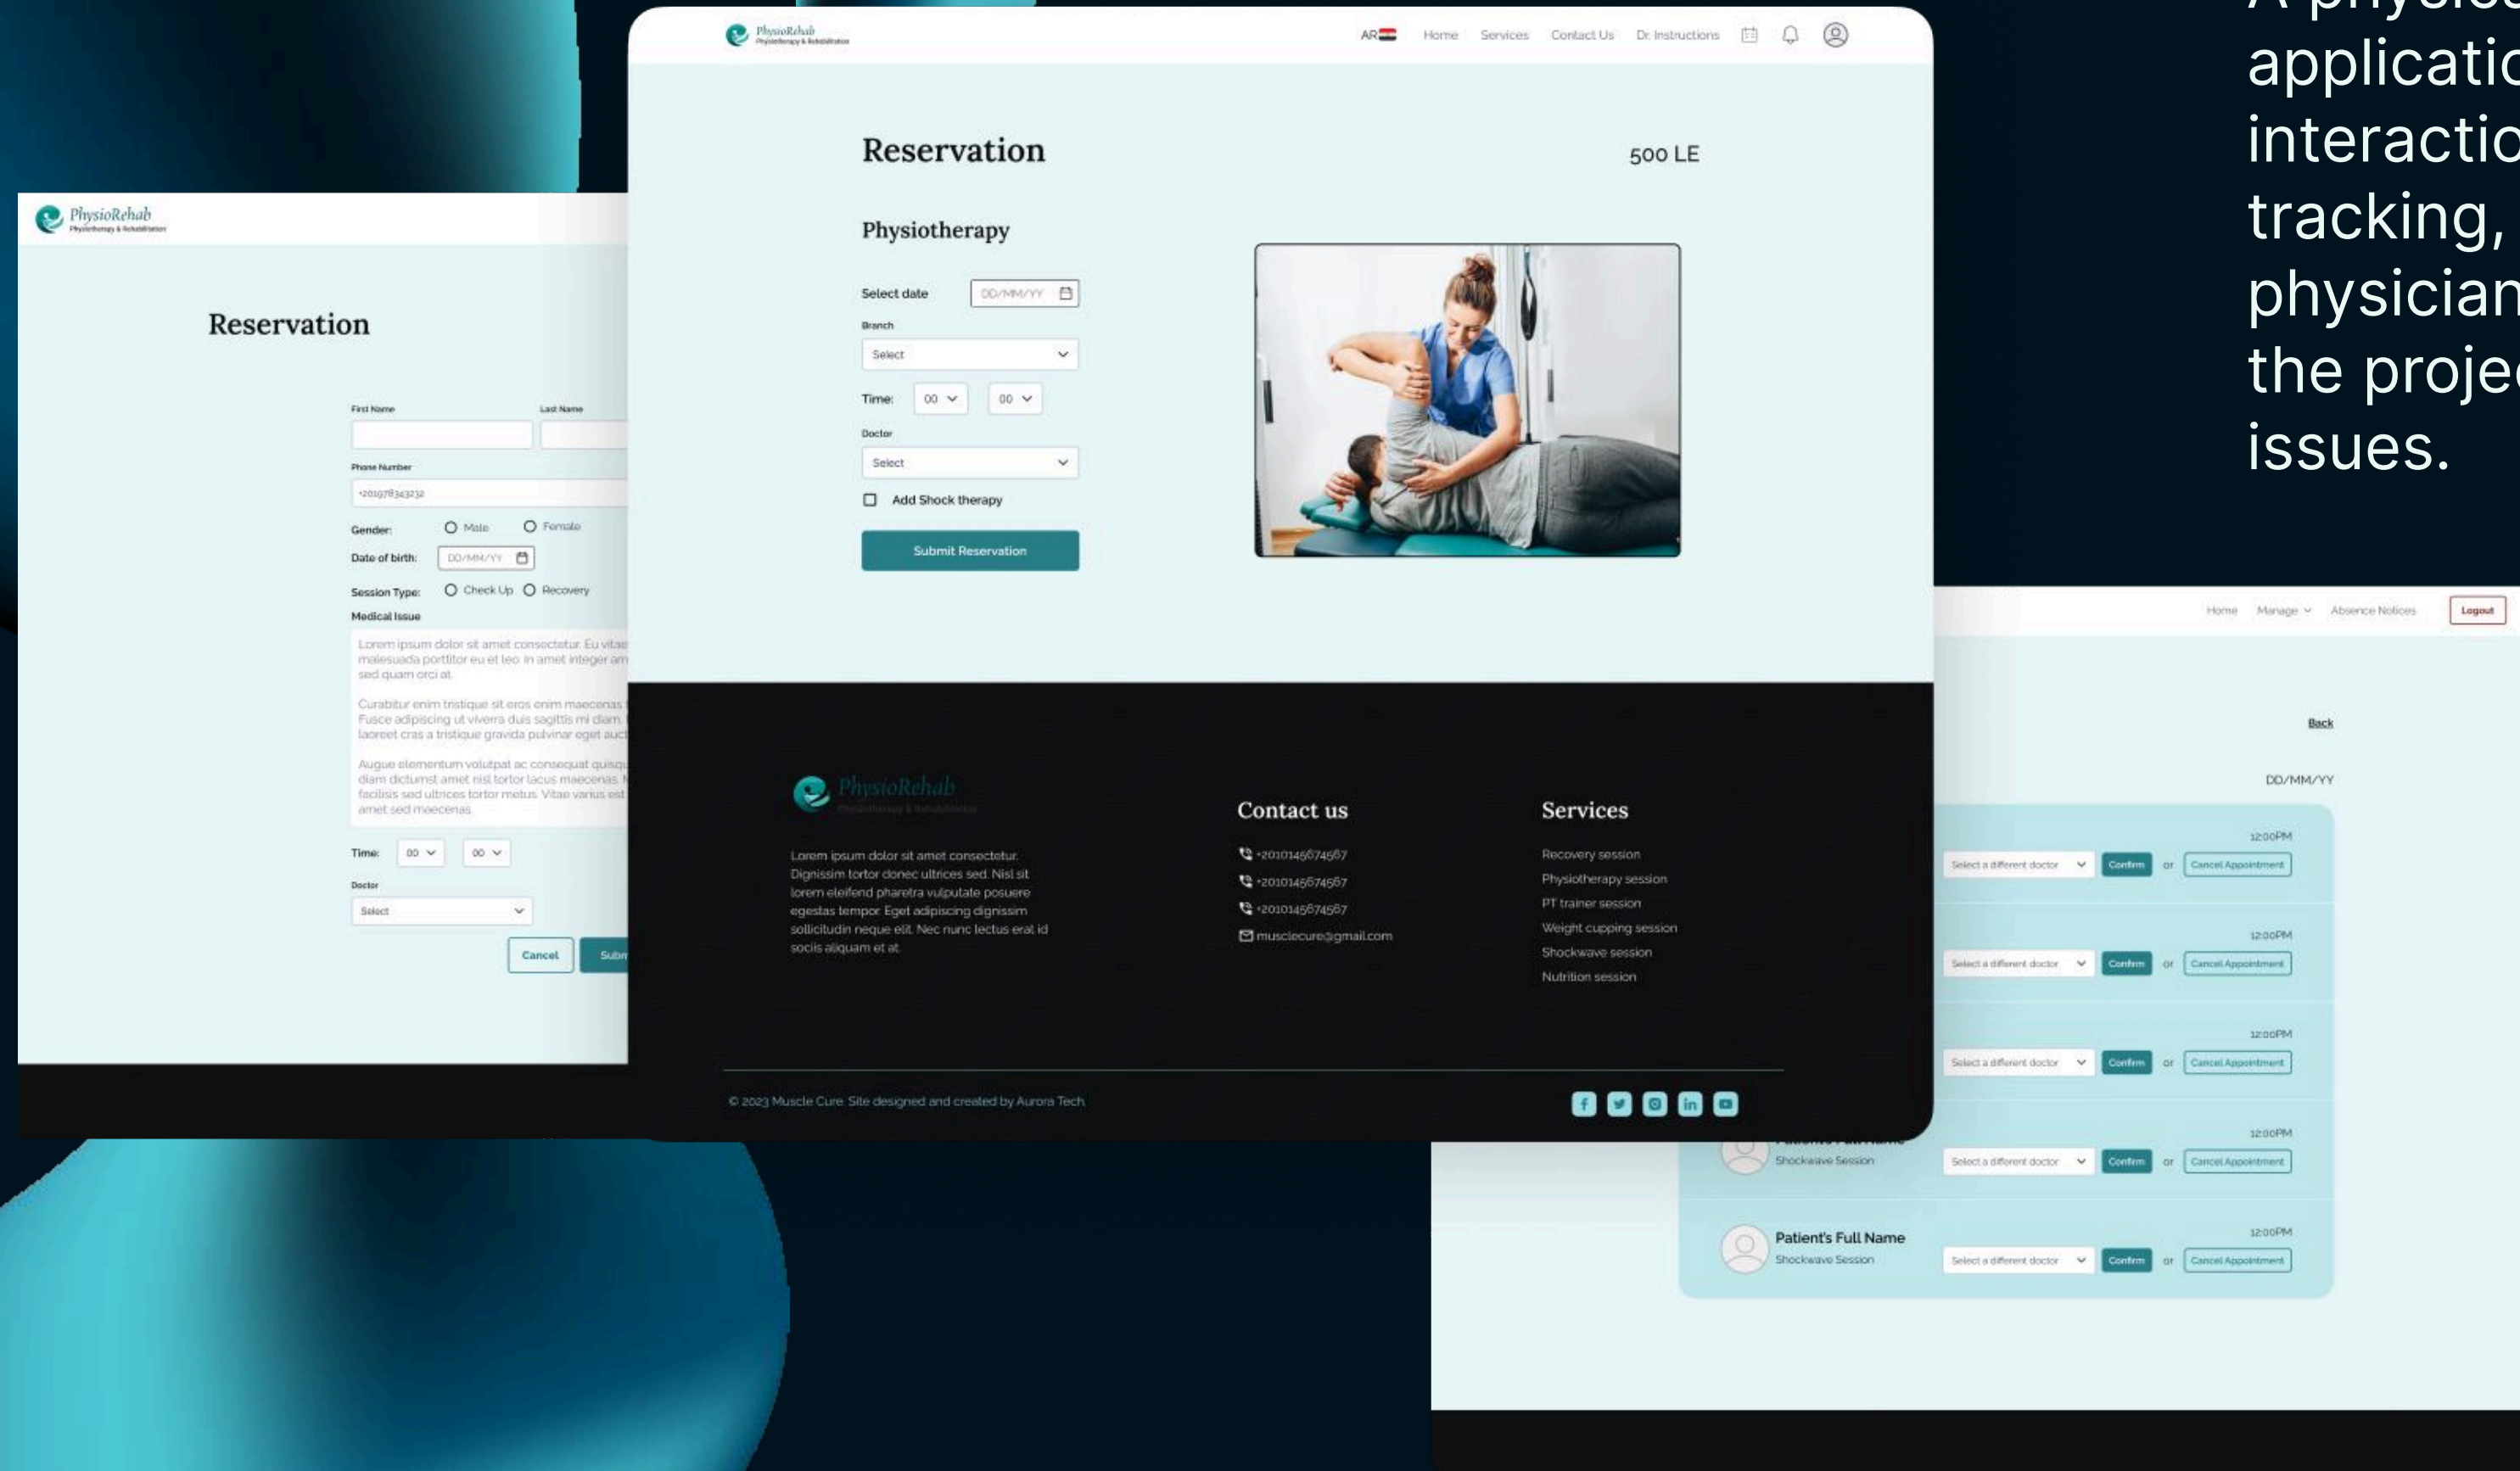

A modern, professional website built for a leading hospital in Saudi Arabia. The platform reflects the hospital's excellence and credibility, featuring a comprehensive service catalog, doctor profiles, and an intuitive contact system for patient inquiries.

Some of our previous work:

Physio Rehab (Website + Mobile App)

A physical therapy clinic equipped with a website and mobile application designed to streamline patient-doctor interactions. Features include appointment booking, treatment tracking, and an in-app chat for direct communication with physicians. While development was successfully completed, the project was ultimately terminated due to client-related issues.

Why Choose Us?

Flexibility and Communication are our greatest strengths. We believe that understanding your vision is crucial to crafting the perfect software solution. That's why we dedicate time to extensive needs analysis and constant feedback loops. Here's why Aurora Tech is your digital partner:

- **Latest and greatest technologies:** We keep up-to-date with the latest technologies to deliver you, the most technologically advanced product we can.
- **Agile expertise:** We embrace change, adapt to your needs, and deliver in dynamic sprints.
- **Communication clarity:** We speak your language, translate tech jargon, and ensure transparency every step of the way.
- **Collaborative spirit:** We believe your ideas are gold, and we co-create digital marvels that exceed expectations.

Think. And we will create.
